# Whistleblower Reveals What is Behind the Mass Attacks on US Food Facilities (Video)

 Amy Mek  January 16, 2023  109 comments  2 min read

**According to Dr. Andrew Huff, the U.S. government coordinated the attacks on the food stocks.**

In the United States, dozens of food processing plants suspiciously caught fire over the past year. Remarkably, no one was present at the time of the fires. The Eco Health Alliance [whistleblower](#), bioterrorism expert, military veteran, and scientist Dr. Andrew Huff has a possible explanation for the food supply fires.

Huff has access to government information about simulating a food supply attack. The information comes from the U.S. Department of Homeland Security's Food and Agriculture Sector Criticality Assessment Tool ([FASCAT](#)). This also includes which places are particularly at risk.

happened: the hard disk with the FASCAT data disappeared.

Since then, there have been about 200 food factory attacks around the world, most of them in the U.S., he explained.

Huff had another backup and analyzed the attacks. It turned out that the attacks exactly matched the most critical systems in his data set. He reported this to the Department of Homeland Security and the FBI but never received a response.

Huff knows that the FBI and the food industry have tried to investigate what he calls “terrorist attacks,” but they’re getting nowhere. He suspects that a government-funded actor or a globalist group like the World Economic Forum is behind it.

Watch Dr. Andrew Huff’s interview with journalist Emerald Robinson:

The video player features a split-screen view. On the left, a woman with long blonde hair, identified as Emerald Robinson, is speaking. On the right, a large fire is burning at night, with firefighters and a crane visible. The text 'Buena Vista Township Fire and Rescue' is overlaid on the fire scene. Below the video, a banner reads 'THE ABSOLUTE TRUTH with EMERALD ROBINSON' and 'MICHIGAN FIREFIGHTERS BATTLE MASSIVE FOOD STORAGE FIRE'. A promotional message at the bottom of the banner says 'Use Promo Code TRUTH At MyPillow.com To Save Up To 66%'. The Lindell TV logo is also present.

buy land, live off grid as much as possible. grow your own food, harvest and filter your own water. get some chickens, cows, goats, fish. compost. you can grow enough wheat on a half acre of land to feed your family for a year. barter, trade. its the only way.

[Reply](#)

All good ideas but here's the real issue: When the SHTF there will be millions of (urban) people who did not do this. They will be desperate and hungry. They will form gangs of large numbers, then they will come for your pleasant little utopia self sustaining homestead.

So part two (defending what you have built) is equally important, but it gets overlooked. No single family will be able to defend their homestead against 10 or 20 people. You will need a group of aligned people (your neighbors) working as a team to protect each other.

And you've overlooked the most obvious thing. The advice assumes something truly outlandish: that everybody knows how to "grow your own food, harvest and filter your own water. get some chickens, cows, goats, fish. compost. you can grow enough wheat on a half acre of land to feed your family for a year."

How many readers of that advice know how to do ANY of that stuff? How many readers of that advice know how to "grow enough wheat on a half acre of land to feed your family for a year."

"Get your fairy godmother to fix everything for you NOW, while there is still time!!!!!" would have been far more sensible and practical advice.

Here is the patience of the saints; here are those who keep the commandments of God and the faith of Jesus. Rev.14:12

The 4th commandment will be the final test. God never sanctified Sunday as His day of worship.

**debra**

January 22, 2023 at 3:44 am

Hi Michael...if You are referring to the late, lingering gathering of the apostles when Eutychus fell asleep and fell to his death...it does say “early on the first day of the week”...the gaathering was lingering late into the hours in fellowship that had been going on throughout the Sabbath (7th day)... they were considered, then to be “early on the first day of the week’ as the switch was from Sabbath to 1st day, as Sabbath closed out. They were going to be collecting offerings and gifts, spending precious last moments together before beginning travels to distant places ON the first day of the week...thus, they were worshipping together, and went late into the night hours {when Eutychus got sleepy in a precarious perch!) He was raised from the dead, the teaching and fellowship resumed until whatever hour they all finally departed to begin proclaiming the Kingdom “to the uttermost parts of the earth”. Shabbat happened, ...and then an Afterglow worship into the early morning of the first day of the week.

Only then, once we have VOLUNTARILY asked Their help, will They LEND us the money to build back what we can, on the land they will own.

Right in Overland Park KS it’s happening. Agenda 21 is coming. CRT in schools. People need to take action. Attend your city council meetings, school board meetings, city planning sessions. Fight for what you have and love NOW, because YOUR RIGHTS are going to be nonexistent soon.

I can say from experience living on a homestead with 11 children and a husband, both around 50 years old, that you sure as hell cannot just “go grow your own food.” Raising animals is easier, but even that isnt easy if you dont have experience....oh yeah, and money. Gardening is a skill and not one that comes over night, which I still do not have after 5 years either. Stockpiling other peoples’ natural produce would be the better idea for sure. I’m looking into it myself. I don’t mean to be a downer but reality is reality and you will set yourself up for failure if homesteading is your backup plan. Not happening....

the burning of food processing plants has been by their owners or lenders to collect insurance before the deep downturn in the economy? This may be far fetched but it is plausible and should be eliminated before coming to other conclusions. Is there any foreign owner or financier of a majority of these burned plants? A lot of well placed elites collected big claims from insurance companies by positioning themselves to own properties that were negatively effected near the Twin Towers on 9/11. So, has an insurance scam been ruled out?

It is crystal clear this current US government is hellbent on collapsing this nation. Out of control spending causing out of control inflation along with destroying food plants to cause shortages and disruption in the supply and demand making the prices go through the roof. Open borders adding as many people as they can to our depleted food supplies. The list goes on and on all the wrongs they are doing and by this point everyone should be able to see the crimes and corruptions this government has committed. The vaccine just hasn't killed of as many people as they thought it would and they couldn't get as many to take the poison injections as they predicted, so comes the mandates to try to force people, that didn't work so expect another virus to hit us in the near future courtesy of the US government.

Sounds exactly like something the democrats the fascist left would do so as to make the populus completely dependent on government and yet here in just another very corrupt way for the communist/socialist/fascist/democrats to try and secure power for themselves. There is no line that they are unwilling to cross, we already know this from the theft of the last presidential election. Enough is enough my fellow Americans while we still have an America to stand up for along with our civil rights. May God watch over and stand with us against this evil.
