Legal expert says 2020 election interference was 'Deep State FBI'

'It wasn't Russia that put their thumb on the scale'

Whether the 2020 presidential election was "stolen" in 2020 as President Trump has charged remains a question, depending on how "stolen" is defined and what is included in the assessment.

There's no doubt there were pockets of corruption, some of which remain unexplained still today. And then there was the \$400 million plus in influence money that Mark Zuckerberg handed out to mostly local elections officials who often used it to recruit votes from Democrat districts.

But probably the least contested claim to election manipulation is the case involving the FBI, which tried to influence the election by telling media corporations to suppress accurate reporting about the Biden family's international business scandals revealed in a laptop that Hunter Biden abandoned.

A poll later revealed that had that information been generally reported, enough Democrats would have moved their vote away from Joe Biden to cost him the election.

Now the blunt assessment has been put into words.

It is Jay Sekulow, chief of the [American Center for Law and Justice](#) who wrote, in a column, "We've all heard talk about 2020 election interference, but it wasn't Russia or any foreign national that put their thumb on the scale of the election. It was the Deep State FBI."

He cited evidence from Judiciary Committee chief Rep. Jim Jordan, R-Ohio, who "continues to expose the Deep State FBI's conspiracy to defeat Trump."

The report revealed Jordan has taken possession of documents "showing that FBI Special Agent Elvis Chan lied under oath about the FBI's knowledge of the Hunter Biden laptop and its colluding with Facebook to suppress the story."

According to the New York Post, Chan, an FBI agent based in San Francisco, "made false statements about his communications with Facebook over the bombshell October 2020 reports that revealed Hunter involved in dad Joe in business deals with foreign nationals."

That's from communications obtained by the committee.

"A Facebook employee said in an Oct. 15, 2020, message that he had spoken with Chan, who said he was 'up to speed' on the FBI's probe of Hunter's laptop and 'that there was no current evidence to suggest any foreign connection or direction of the leak," the report said.

Sekulow pointed out even Facebook's Mark Zuckerberg has admitted that the FBI purposefully conspired against the American people by censoring free speech on social media.

"This is censorship is one of the greatest threats to free speech I've seen in my 40-year law career. In fact, a federal judge declared it 'Orwellian' and 'arguably the most massive attack against free speech in United States' history."

That verdict came in a case in which states are challenging the Biden administration's censorship, and the case is now before an appeals court.

IMPORTANT NOTE: *To their horror, America's ruling elites failed to knock out Donald Trump during his four years as president via the fabricated Trump-Russia collusion scandal – conceived and funded by the Hillary Clinton campaign, as the Durham report proves – or through two circus-like impeachment trials. Later came "January 6," a demonstration-turned-riot by Trump supporters who passionately believed, with good*

reason, that the recent election – and therefore their country – had just been stolen from them. Members of Congress now want to constitutionally bar Trump from again seeking public office for having instigated “an armed insurrection” (no protester was armed) against America.

Then in March, Trump was indicted in New York on 34 counts of falsifying business records, and in June, still more indictments were filed against Trump – 37 federal criminal charges related to his handling of classified documents. Honest legal experts not in league with the Biden administration openly classify these indictments as somewhere between frivolous and idiotic, not to mention grotesquely politically motivated.

The Deep State’s never-ending persecution of Donald Trump, as well as the incredible back story of the totalitarian agenda Trump’s persecutors are attempting to implement in America and why Trump represents a mortal threat to their nefarious designs – is the focus of the blockbuster July issue of WND’s critically acclaimed monthly Whistleblower magazine, titled “[THE PERSECUTION OF DONALD TRUMP: Why the ruling elites loathe – and fear – the 45th president.](#)”
