Are you telling me all those “stand here” circles on the floor of the grocery store were just for show!?!

I’m shocked!

All the TheExperts™ promised me I had to follow the TheScience™ or grandma would die!

These Covid regulations caused hundreds of small businesses to close. Seems like that was the purpose of the regulations if there was no science behind it.

With false claims of urgency, no demonstrated evidence of benefit over cost, & obvious conflicts of interest, proceeding with a late May vote is irrational & irresponsible. This agenda needs to be postponed & properly considered. The world deserves better.

I just feel like if there's a deadly worldwide pandemic happening and you're the NIH Director you wouldn't really have time for this. 🤔
