EU DATA DOWNLOAD :

Eudra-vigilance is the European equivalent of VAERS - and includes adverse reaction reports for all vaccines, substances and products used in the European Union (includes Astazeneca data). For the first time all Eudra-vigilance data is available as a downloadable zip 500 Mb - containing files covering all pharmaceuticals, substances, products and vaccines for the period 2017 to 2024.

Each record contains the drug name and the adverse effects. So, symptom frequencies can be calculated for each drug, and we can see if there is an excess frequency compared to other drugs. By ranking drugs for different symptoms, this project will help people identify safer alternatives.

VACCINE SEARCH:

Based on 33 years of VAERS data for 99 different vaccines and 16849 different symptoms, ([read more here](#)), SAFETY SIGNAL is a search engine for checking out any vaccines.

- Enter a vaccine name and it will display all the symptoms for that vaccine ranked by strength of safety signal.
- Enter any symptom and it will display all the vaccines with that symptom ranked by safety signal.

Your Rights

Your rights rest on more than what is legal (laws passed by man) – for example your rights also rest upon individual conscience and upon laws revealed by God. However, here I will restrict myself to outlining the legal basis for your rights - the actual active laws that protect your life and liberty.

There are several pillars upon which your rights rest –

1. **Magna Carta** (and all subsequent confirmations) : The body of prior laws that show that a person cannot be harmed or suffer loss of freedoms without a fair trial before an unbiased jury
2. **The Oath of Coronation** : The Monarchy has sworn to uphold the laws and freedoms of the population, and also uphold the Protestant Faith, and all its codes of conduct.

3. **Human Rights Act 1998** : This put into statute the recommendations of the European Commission on Human Rights and the Universal Declaration of Human Rights. Your rights are now law.
4. **Common Law Principles**
5. **Health & Safety Law**
6. **Medical Law**
7. **Clinical Trial Law**
8. **Data Privacy Law**
9. **Censorship Law and Freedom of Speech**
10. **Freedom of Thought and Religion**

All of these laws were violated by COVID-19 policy and its implementation. However **none of these laws can be derogated under any circumstance** - so their violation by lockdowns, social distancing, forced quarantine, PCR and vaccinations was illegal, and remains illegal. This is one of the reasons why many are now rejecting mandated medical treatments with experimental jabs.

It is becoming very obvious that the COVID Mandates were totally illegal - breaking -

1. Human Rights Law
2. Common Law
3. Medical Practice Law
4. Clinical Trial Law
5. Health & Safety Law
6. Privacy Law
7. Censorship Law
8. Hate Speech Law
9. Safety Testing Regulations
10. Animal Testing Protocols
11. Efficacy Testing Regulations
12. Good Manufacturing Practice
13. Mislabelling of the product (Gene Therapy not vaccine)

It is not an exaggeration to say that in EVERY POSSIBLE WAY the COVID vaccination program was and is illegal. Can any government pass new laws that break all of the previous laws, or will those new laws be illegal? Imagine a government who passes a law allowing you to kill your neighbour for any reason - is such a law suddenly legal just because the government passed it?

The breaking of so many prior laws is a strong indication that there is an INTENT TO HARM. These laws were created primarily to protect YOU. When so many of these laws are willfully broken, then the purpose cannot be health or anything good.

Given the total disregard for law demonstrated by COVID policy, you have absolutely no need to comply with such policies. In fact you have a duty under the law to reject and oppose such policies.

Please remember three things -

1. You cannot be punished for non-compliance with something that is illegal.
2. In fact, you have a duty under the law to resist something that is illegal
3. Any organisation that mandates or coerces something that is illegal can be sued for losses and damages

: The psychological effect of widespread vaccine injury - 9 in 10 people declining further vaccination. The drop off in COVID vaccine uptake in most countries has been staggering - see [Drop off](#)

Since voluntary uptake is failing, government hopes to reach people instead by putting mRNA into other traditional vaccines such as the flu jab.

Childhood vaccinations now contain mRNA

Vaccine Manufacturers May Be Changing Many Childhood Vaccines to contain mRNA Like the COVID Shots!

: mRNA in ALL childhood vaccines ? See [WARNING : Danger - many childhood vaccines now contain mRNA](#)

!! WARNING : The latest flu vaccine / booster scheduled for release in Autumn 2022 contains mRNA for producing three variants of spike protein + the flu vaccine combined into one shot. FDA and CDC have exempted these shots from ALL safety testing. The spike protein causes extensive damage to internal organs, and effects foetal development. Please exercise parental oversight and extreme caution.

In August 2020 Alex Azar, the Health Secretary for the USA, announced that all childhood vaccines would be "countermeasures", and as such, military products for which the ingredients would remain undisclosed. The World Health Organization, Johns Hopkins, and Bill Gates have just conducted another pandemic simulation — this time the virus is deadlier and targets children. The exercise was called Catastrophic Contagion and held in Brussels, Belgium on October 23, 2022. The reason why it specifically targets children is most likely because it is a "countermeasure" injected directly into the arms of children as part of the childhood vaccine schedule.

So IF YOU CURRENTLY HAVE a Sars Cov 2 infection, DO NOT take the vaccine. It amplifies the disease, guaranteeing heart damage.

777 employees at the University Hospital of Basel, Switzerland, were vaccinated with the 1st Covid-19 booster (3rd jab) in December 2021 and January 2022. In all cases, after 3 days their troponin levels were measured. 3.7% (1 in 27) of the women had elevated troponin levels indicative of some heart damage. 0.8% of the men had elevated troponin. It is worth employers knowing that if they vaccinate all of their employees, 1 in 27 of the women will suffer some heart damage within 3 days of vaccination. See - [Study](#) See also [pdf](#). Why didn't they measure troponin levels after day 4? Instances of heart damage occur over at least 30 days after COVID jab, yet the study only counts the first 4 days?

It is worth stating that there is no such thing as "mild" myocarditis in kids or adults. It leads to fibrotic and dead heart muscle. And when elevated troponin indicates heart damage on day 3, troponin may

cease on day 4, but the scarring and dead heart muscle will remain. The heart walls are under tremendous pressure, and areas of dead muscle may induce serious or fatal outcomes later, and lead to varying degrees of functional impairment.

A new University of Oxford study published in the American Heart Association journal Circulation found that a COVID-19 vaccine is actually four times more likely to cause myocarditis in men under

the age of 40 than a COVID-19 infection. See - [Oxford Study](#)

From September 2022, covid vaccines are no longer available in the UK for children under 12 years old. Were childhood COVID vaccines withdrawn because of the increase in deaths?

However, UK is substituting the COVID-19 shot with a bivalent flu shot that contains the covid vaccine. This bivalent shot is just as toxic as the previous Covid shots - 15% of the reported cases are serious adverse reactions - involving death, cardiac damage, clots, autoimmune disease etc - You can read the reports for yourself - [first 106 bivalent case reports in VAERS](#)

In the UK, vaccination of children aged 5 to 12 years old began in week 14 of 2022 and lasted until week 35 - a period of 21 weeks. During this period, child death was 22% higher than during the same period in previous years.

"42% of people with regular menstrual cycles bled more heavily than usual following COVID-19 "vaccination". Among respondents who typically do not menstruate, 71% of people on long-acting reversible contraceptives, 39% of people on gender-affirming hormones, and 66% of post-menopausal people reported breakthrough bleeding." See [Study](#) or [pdf](#)

So-

- 42% had increased bleeding
- A large % of people who weren't menstruating, began to bleed
- 66% of those who were post-menopausal, began to bleed again

This raises some questions -

1. Does excessive bleeding effect fertility ?
2. Does excessive bleeding effect the fetus ?
3. With such a high % of excessive bleeding, why isn't the main stream media reporting on this ?

4. With such a high % of excessive bleeding, why do governments insist that the vaccine is safe (even though they never tested it on pregnant women during any trials) ?
5. If the vaccines cause excessive bleeding in women, then do they also cause leakage of blood internally into surrounding tissues ?

This last question is of great significance. If external bleeding is a significant phenomenon, what about internal bleeding? It has been shown that the spike protein attacks the endothelial lining of blood vessels, causing inflammation and clotting, but also weakening that lining - allowing the leakage of blood into surrounding tissues. See... [Blood Clots](#) and [Nerve damage](#)

Can you possibly imagine the effects on a child if right from the outset its blood vessels were weakened and clotted and made leaky ?

Study of blood samples from 1006 vaccinated patients showed severe aggregation of erythrocytes - red blood cells were deformed and stuck together. This aggregation effect causes breathlessness and headaches...see [Blood Effects](#). The fetus depends upon the mother's blood supply for oxygen. Such aggregation will obviously reduce the oxygen reaching the fetus, and at birth the child may have difficulty breathing.

: Infertility by Vaccination : a history of WHO programs in Africa. See.... [Infertility by vaccination](#)

The WHO carried out research to develop a vaccine for the intended purpose of inducing infertility. Here is their published research - [WHO infertility vaccine](#)

So the WHO undertook research and development of vaccines that induce antibodies to HCG for the stated intention of inducing sterility and lowering population. In 2014, they distributed this vaccine in Africa under the guise of a tetanus vaccine, since combining it with a tetanus antigen was found to be highly effective. Independent labs found that campaign batches were spiked with HCG whereas other stock stored by the government were not spiked. Both had exactly the same labels and batch codes. In Dec 2020 independent labs found that vaccine bottles used in the campaign (containing the HCG) had been relabelled, with a new label stuck on top of the old one. The new label made these vaccine batches look like government stock, but the label underneath had different batch codes, and showed they were from an independent manufacturer (the Serum Institute of India). On April 29th 2021, the whistleblower was killed. In that same month, COVID 19 vaccines began to be distributed on masse to the general public.

If their intention has been to kill the unborn, then how much of a stretch is it for them to extend that intention to others - the aged first, then later those of reproductive age ?

Tom Renz obtained the DMED data showing the typical numbers of military with cancer or cardiac symptoms during the 5 years prior to vaccine rollout. The data also showed the numbers with these symptoms in 2021 after vaccine rollout. By comparing the 2021 numbers with the average for previous years, we get an estimate of the number of excess cases of cancer and cardiac associated with the vaccine rollout. There were 74,000 excess cases of cancer in 2021- 3.5% of the entire US military! There were 87,934 excess cases of cardiac damage in 2021 - 4% of the entire US military ! See here - [World at War](#)

For civilians, the DMED data is of particular interest because civilians exposed to the same toxins would be expected to experience the same % of issues.

Biden has finally been forced to submit to congress and stop mandates of the Covid 19 vaccine for the military. However, they are now rolling out mRNA versions of all the traditional vaccines, which looks as if it was a fall-back plan once the adverse effects of Covid 19 vaccines became too apparent. What congress need to push for is the suspension of all mRNA vaccines period. And all vaccines must be subject to regulation and transparency - none should be couter-measures - none should be exempt from transparency and scrutiny. In the mean time, military personnel are warned to be wary of a clear and present danger. [WARNING : Danger - many traditional vaccines now contain mRNA, and all are exempt from regulation.](#)

In this video a navy medical officer states that heart failure has increased by 963% since vaccine rollout, and myocarditis by 150%. Other forms of heart disease are less reported. The reason for this discrepancy is most flight personnel will be reluctant to report lesser adverse reactions such as palpitations, tachycardia, bradycardia, arrhythmia and the like, since it would affect their employment. However they cannot avoid reporting heart failure, since it is so catastrophic that it is impossible to keep it hidden. [US Navy medical officer discovers heart problems linked to Covax vaccine](#)

Several undertakers and embalmers are speaking out regarding the discovery of rubbery amyloid clots within the veins of the vaccinated - sometimes of considerable length and resistant to breakdown by enzymes. These amyloid clots obstruct the infusion of embalming fluids.

Dr John Campbell Amyloid clots are a real phenomenon following C19 vax - occurring in 20% of corpses in the UK. John Campbell has received 250 samples of these clots. This is a completely new pathology since the jab rollout. See.... [Dr John Campbell](#)

: Major Tom Haviland : USA Airforce These amyloid clots consist of amyloid protein, fibrin and platelet. They stretch like a rubber band. These clots are almost certainly the cause of death. These amyloid clots occur on the venous AND the arterial side of the body - ordinary clots are always on the venous side. These clots are in the 6 to 10 inch range - though some can be up to 2 ft long. Ordinary clots look and feel like jelly and dissolve in your hands. In comparison these amyloid clots are much tougher and longer lasting. These clots block blood supply - they fill the entire blood vessel - taking its shape - like a cast. They appear to continually grow. During 2020 44 embalmers saw these clots, but the incidence of these clots exploded in 2021. In both cases, the spike protein causes the clot formation. In 2022 about 30% of corpses contained these amyloid clots. In 2023 the percentage decreased to 20%. Embalmers have never seen this phenomenon before. A fifth to a third of corpses have these clots. 20-30% of people dying have got these clots ! In addition there has been a great increase in the incidence of traditional jelly clots and micro-clotting. A survey was sent to 50 national undertakers associations, and to 1700 funeral homes. 197 out of 269 embalmers are still observing these clots in 2023. Hooker serves on the advisory board of Worsham College of Mortuary Science, is a member of the BIE (British Institute of Embalmers) and board member of the North American Division. He also travels around the nation providing lectures to other embalmers on perfecting the

process and navigating unusual problems. Hooker confirmed an increase in strange blood clots in the past two years, not just witnessed by himself but by other morticians from across the nation who send him photographs.

"I have lectured four times so far this year," Hooker said. "I am asking questions and showing pictures of these clots in my Powerpoint, and routinely, everywhere I lecture, people say they are seeing these clots, and have not seen them prior to COVID."

Censorship of Doctors

Censorship has been universal, thorough and systematic - indicating that it is centrally coordinated and government sanctioned.

Perhaps the greatest testimony to the dangers posed by these vaccines is the strenuous effort that governments have made to silence any doctor who disagreed. Why would the government feel the need to control the expression of opinion - unless they knew free expression would side against them.

Everyone trusts their doctor and holds their opinion in high esteem. Governments know this, and decided that the opinion expressed by doctors must be tightly controlled - controlled by politicians and bureaucrats, rather than rely on the judgement of those on the frontline of patient care. The control was implemented in every country by medical associations and medical boards, who threatened doctors with loss of registration and loss of medical licence if they expressed any disagreement with Government Covid policy. Doctors were NOT ALLOWED to inform patients of ANY risks associated with the vaccines. Doctors were not allowed to provide ANY exemptions - even if a person had a serious reaction to the first shot - they were not allowed any exemption from the second !

So the governments turned doctors into silent puppets - who were only allowed to mouth a fixed mantra "Safe and Effective". The normal processes of science, by challenge and debate, were suspended - and bureaucrats took over the decision making as to what treatment was fit for every patient.

Physicians and surgeons: unprofessional conduct.

ABSTRACT

Existing law provides for the licensure and regulation of physicians and surgeons by the Medical Board of California and the Osteopathic Medical Board of California. Existing law requires the applicable board to take action against any licensed physician and surgeon who is charged with unprofessional conduct, as provided.

This bill would designate the dissemination of misinformation or disinformation related to the SARS-CoV-2 coronavirus, or "COVID-19," as unprofessional conduct. The bill would also make findings and declarations in this regard.

Censorship of Social Media & Search Engines

Google, as the primary search engine, has applied systematic censoring. See - [Google Insider Goes Public](#)

In addition to these direct attacks upon official data sources, social media and search engines have also imposed censorship. The censorship imposed by Facebook is well known, with the testimonies and Facebook groups for hundreds of thousands of vaccine injured being deleted - with no explanation except that it goes against Facebook policy.

Censorship and Scrubbing of Official Databases

- The deletion and altering of records in the VAERS database

New documents reveal the Biden administration pressured Facebook to remove and limit the sharing of TRUE information about the side effects of COVID vaccines. Folks this is evil.

Censorship of Social Media

Facebook routinely deleted groups for vaccine injured testimonies. People posted testimonies of personal vaccine injury and these were labelled by Facebook as misinformation. Groups as large as 100,000 were deleted. Twitter also routinely deleted any medical information or personal testimonies if these disagreed with the government narrative. See [Twitter](#)

Indemnity of Doctors, Nurses, Medical Centres, Pharmacies and Hospitals ?

Those administering the vaccines may not be protected from prosecution for harms caused by the vaccines, especially if they have failed to provide full informed consent. In the letter shown below, the Australian Medical Practitioners Society has informed vaccine administrators that they can be held liable for damages. See - [Indemnity ?](#)

People may also decide to boycott services that failed to provide adequate information about adverse effects, or who used coercion such as restrictions on employment, medical treatment, or access to education.

Long Term Effects

The Israeli government commissioned a study of vaccine side effects. The results are described in this video, ([Study](#)). The researchers found -

1. **PERSISTENCE** : more than half of reported side effects lasted longer than 6 months
2. **CAUSALITY** : the vaccines caused the side effects, as demonstrated by using "re-challenge".

"The significant gap was in the characterisation of the duration of the side effects. As in the leaflet, it was explicitly written that these effects should pass within a few days, and we saw that this was not the case, because in 50% of the reports in which a duration was specified, the duration was over 6 months."

Also, the study repeatedly found a causal relationship of new and long term side effects, and the vaccine. The findings revealed a high rate of rechallenge (recurrence of an SE after repeated doses), which as the team repeatedly stresses, establish causal relations with the vaccine.

"When I look at these side effects and analyse their duration, then here was really a surprise. In most of the reported cases - long term side effects were represented that lasted for more than a month. I set a month as some sort of cut off point because I thought that for neurological symptoms there were some expectations that they would go away within upto a month, and once we look beyond a month, then that's something that suggests something that we didnt know before.

65% of the time there was actually no end. They said "I've been in pain for 5 months and its still ongoing. I mean, we really dont know the ranges in terms of the end."

And it turns out that Pfizer claimed in an internal meeting with the Minister of Health, that it did not know about long term side effects..."

Blood Clots

That the spike protein of the SARS 2 virus causes clotting is not in doubt at all. A simple googling of the phrase "spike causes clotting" will throw up an almost endless series of studies showing this. Try it yourself. It is the spike part of the Sars 2 virus that causes this clotting. It therefore follows logically that if the Covid 19 vaccine is inducing your body to produce this spike protein, then vaccinated people will also experience clotting.

1. Premise 1 : Spike causes clotting
2. Premise 2 : Vaccine induces cells to produce spike
3. Conclusion : Micro-clotting, strokes, thrombosis, edema will occur in the vaccinated

There seems to be some kind of mental block that causes people not to follow this simple logic. It is as clear as day that if the spike causes clotting, and if the vaccine produces spike, then the vaccinated will get clotting. What is perhaps less clear is WHY the governments would push / coerce a vaccine that had this effect ? Such irrational policy has resulted in a massive increase in the incidence of strokes, even amongst the young.

The spike protein of the SARS-CoV-2 virus **may cause abnormal bleeding or clotting**¹. It attaches to your cells' ACE2 receptors, impairing the receptors' normal functioning, which may alter tissue functioning and could be responsible for triggering autoimmune disease or causing abnormal bleeding or clotting, including vaccine-induced thrombotic thrombocytopenia¹. The spike protein **induces expression and secretion of a series of clotting proteins**². It has been proven to cause synctia in the lung, resulting in extensive blood clotting of the lung arteries and veins (thrombosis)³.

Reports such as these make it imperative that doctors and medical researchers do their own independent research by collecting and examining blood samples from their patients. Normal blood cells have a negative surface charge, and this causes them to repel each other so that they do not clump together but rather they flow past each other smoothly. However, lipid nano particles have a positive charge (hence they are said to be cationic). When these LNPs merge with blood cells, they change the surface charge of the infected blood cells to positive, causing blood cells to clump together like stacks of coins. Such clumping inhibits blood flow and reduces the uptake and release of oxygen leading to breathlessness, respiratory distress and a higher incidence of clotting

Swedish researchers have found that the SARS COV 2 spike protein generates amyloids. The spike protein contains SEVEN distinct peptide regions that form amyloids when incubated at 37 degrees C. When the spike protein is exposed to NE (neutrophil enzyme) the enzyme cleaves the spike protein exposing the peptides that are amyloidogenic, and amyloids are generated within 24 hours. The researchers found that sequences 192–211, 601–620, 1166–1185 were particularly amyloidogenic. Neutrophil enzyme is excreted at the site of ANY infection, or inflammation, making the vaccinated vulnerable to amyloid formation following either of these. Here is a link to the paper - [Paper](#)

Undertakers have noticed that the first cases of amyloid clots appeared in May, five months after roll-out started. This suggests that the slow accretion of amyloid takes about 5 months before it becomes fatal

In the link provided below researchers in Sweden have found that amyloid formation is triggered by the spike protein when in the presence of an enzyme excreted by neutrophils. Neutrophils are the first immune cells on the scene when you have an injury or infection. **What this means** is that a vaccinated person will start developing the amyloid clots as soon as they have ANY type of

inflammation, infection or injury. The vaccine has literally weaponised your immune system by using a common excretion from immune cells to react with the spike protein to generate an amyloid growth.

The spike proteins, produced by the Covid 19 vaccines, pass through the blood-brain barrier and cause endothelial damage to the lining of blood capillaries that feed nerve cells in the brain. Damage caused to the capillary lining causes inflammation and clotting of those capillaries. Nerve cells fed by these capillaries can no longer receive a blood supply, and consequently die. Brain damage results. Damage of the lining of capillaries also causes leakage of blood into the brain tissue. When exposed to the spike protein, the myelin sheath, that insulates nerve fibres, is degraded - leading to disruption of nerve transmissions. These are very serious effects of the spike protein, and are expected to lead to personality changes and memory and cognitive deficits. By damaging the frontal cortex - these changes are also expected to reduce the critical abilities of Covid 19 vaccine recipients.

Bells Palsy

This is paralysis of one side of the face - resulting in an inability to smile or express emotion with facial muscles or eyes, difficulty eating, numbness. The destruction of nerve cells is caused by the occurrence of micro clotting in the brain - that's why Bells Palsy was known as "cerebral micro-embolism" prior to 2008...Imagine being trapped in a body that cannot express itself outwardly - that looks distorted, broken and emotionless...

Tremor

A common form of nerve damage following Covid "vaccination" is tremor. The nerve damage results in uncontrolled movement, which can be extremely painful since the muscles constantly pull against each other. Normal daily activities are impossible, and there is no rest. Muscle injury and fatigue result from constant uncontrolled movement. Nerve damage and death of nerve cells can result from micro-clotting that restricts the flow of blood to tissues resulting in cell death. It may also result from auto-immune attack upon the myelin sheath that surrounds nerve cells - stripping nerve cells of the insulation layer that allows the transmission of impulses.

Despite a covid "pandemic" in 2020, incidences of tremor rose by 19 x after introduction of the vaccine in 2021 !

Despite the high number of COVID vaccine injuries, the governments and regulatory authorities have ignored these safety alerts, and pushed ahead with the vaccination of children. Instead of suspending the COVID vaccines pending an investigation, they refuse to acknowledge any injuries, and actively censor information about vaccine injury on both main stream and social media. People are denied informed consent, and instead are coerced with threats of job loss.

Loss of Immunity - Increased Infections

: After 4 shots, the immune system in mice was destroyed. See [Alex Berenson Substack](#) See also [Chinese Study](#)

The Chinese study referenced above notes - "Multiple (4) vaccine boosters **profoundly impaired** CD4 and CD8 T cell activation, and **overturned** protective immune memories. Our findings

*demonstrate potential risks with the continuous use of Sars Cov 2 vaccine boosters, providing **immediate** implications for the global Covid 19 Vaccination enhancement strategies."*

: A 700,000-person study from Israel two weeks found that those who had experienced prior infections were 27 times less likely to get a second symptomatic covid infection compared to those who were vaccinated See [Washington Post](#). See also [Israel Study](#). See also [Video - Health Subcommittee](#)

The Israeli study referenced above notes that those who received the COVID-19 jab were **27 times more likely to be re-infected** with COVID. It's not just that the vaccine doesn't work - it does the exact opposite and vastly increases the chance of infection!

: Reactivation of Herpes Following Covid 19 Vaccinations. See [Herpes Zoster](#)

I took a sample of VAERS records consisting of the Pfizer EN batch series, and analysed the adverse reactions to obtain the frequency of each of the symptoms. See [Study 1](#). The most commonly occurring symptoms were - Covid-19 and Herpes.

In a second study, I looked at the symptoms associated with immediate vs delayed deaths following COVID-19 "vaccinations". See [Study 2](#). I found that the dominant symptom for immediate death following vaccination is cardiac arrest, whilst the dominant symptom for delayed deaths is COVID-19. See also [Video](#).

In a third study, I was analysing a curious second peak in deaths that occurs 5-6 months after vaccination. See [Second Peak](#), and found that the dominant symptom was COVID-19. See especially [Study 3](#), and [Walgreen's Study](#)

Autopsy

: Autopsy : mechanism of injury . See [Autopsy](#)

Autopsy shows that the COVID-19 mRNA shots cause severe inflammation, destruction of blood vessels, clotting, and immune attack upon body cells. Tissue samples clearly demonstrate destruction of blood vessel lining and severe damage to the muscular layer of arteries. Such dissections and ruptures are prevalent in vaccinated cadavers. Damaged areas show heavy infiltration by vaccine induced spike proteins, and consequent infiltration by immune cells (lymphocytes) leading to chronic inflammation. Heart and lung tissues are damaged by the same mechanisms - leading to myocarditis and respiratory distress.

Good Lots and Bad Lots

!! : Variation in Toxicity Between Vaccine Manufacturers (EU Data) See...[EU Data](#)

In the table of EU data shown above, 1 in 1970 doses produce a serious reaction. So, if you take 5 doses, your chance of a serious reaction is 5 in 1970 = 1 in 394. This calculation assumes that the doses do not have a cumulative effect. If they do have a cumulative effect, then the chance of a serious reaction after 5 doses will be worse than 1 in 394.

This calculation also assumes that all serious cases have been recorded. It is estimated that only 1 in 40 serious cases are reported, in which case 1 in 50 doses would produce a serious case, and after 5 doses the chance of a serious case would be 1 in 10

- do they uphold the Ten Commandments ??

The man who has been appointed deputy in charge of the Monkey Pox Pandemic Response is Dr Demetre Daskalakis - See ... [White House Briefing](#). However Daskalakis appears to endorse a radical cult - as can be seen from his public photos - [Photos](#). According to Wikipedia ([Wiki](#)) - "*Satanism challenges both the Ten Commandments and the Golden Rule, advocating instead a tooth-for-tooth philosophy - advocating social Darwinism - "Death to the weakling, wealth to the strong!"*". This philosophy is quite compatible with eugenics, the ascendance of an elite, and the removal of "useless eaters"...Government appointment of officials who support cults that are morally ambiguous, or even morally inverted, suggests little or no intent for protecting the rights of citizens. Will such governments uphold your right to

- uncensored truth ?
- informed consent ?
- bodily autonomy ?

or are they letting all the rules slide ?... When governments fail, people cease to listen.

The New Bivalent Booster for Flu and COVID

: The New Flu Vax planned for autumn 2022 - **NOT SAFETY TESTED** - containing the mRNA for **MULTIPLE** variants. See....[Latest Flu Vax \(exercise extreme caution\)](#)

Dr. Paul Offit, MD is the Director of the Vaccine Education Center and practices medicine in the Infectious Disease department at the Children's Hospital of Philadelphia and he also sits on the FDA's Vaccines and Related Biological Products Advisory Committee (VRBPAC). In this video, he states that there is scant evidence for the efficacy of the bivalent vaccine - and when asked if he would authorise it, his response is "Hell no" - [Paul Offit](#)

: Why is the Government pushing the bivalent booster and suppressing Ivermectin See ["They Want You to Die !"](#)

Is your shot spiked? : The latest flu vax contains the mRNA for multiple variants of Covid (3 variants of COVID) + the flu vax. So your flu vax will contain the mRNA for the spike. Since the spike protein is known to be highly toxic, therefore adverse reactions will persist.

So pharma is now combining spike mRNA with traditional vaccines such as flu and tetanus, so please exercise caution when considering ANY vaccine shot, until you can be certain that your shot has not been "spiked".

: Moderna Clinical Trials Terribly Flawed. See.... [Sasha Latypova with Robert F Kennedy,Jr.](#)

: Pfizer Safety Trials :What the FOI docs reveal. See [FOI Docs](#)

In these videos, ([DOD Involvement 1](#) and [DOD Involvement 2](#)) Sasha Latypova analyses documents revealed through FOI, and states that the US military has a very strong involvement in the development, ownership, operational management, authorisation and distribution of the COVID vaccines - in particular -

1. The covid vaccines are classified as military "counter-measures" - not just for civilian use

(does military "counter-measure" mean "bioweapon"?)

2. The Chief operating officer is the DOD
3. All covid vaccines are distributed from pharma to the DOD, and then to the public.

(why is it passing through the DOD?)

4. None of the covid vaccines have tracking codes or bar codes, which is very very odd since normal practice is to include a tracking code so bad batches can be traced back to a source

(DOD is a black box, and so its products cannot be tracked?)

5. The DOD micro-manages all interactions between pharma and regulatory authorities - insisting that there are atleast 4 members of the DOD present at every meeting. Pharma is even prohibited from writing to the FDA or communicating with them in any way without a DOD authorisation.

(why are the DOD involved in the authorisation of these vaccines?)

6. The DOD and Federal government have ownership of the vaccines. Pharma was paid billions in return for surrendering complete control and micro-management of all processes to the DOD

Products for military use are often immune from scrutiny; the DOD is a black box.

It is curious that the company responsible for making Sars-Cov-2 infectious to humans (by addition of the Furin site), and responsible for giving it the ability to disable DNA repair (by over expression of MSH3) also happens to be the manufacturer of a "vaccine" which is supposed to fight that infection.

It is also curious that this vaccine induces your cells to produce the spike - very part of the "virus" that is responsible for disabling DNA repair. The analogy would be - using petrol to put out a fire (a fire that was started by the firemen who then profited from the sale of the petrol).
