The Entire Climate Change Scam PROVEN A LIE

“Those who understand the science understand that it is fundamental. Humans cannot and do not affect the level of carbon dioxide in the atmosphere. It's controlled by nature entirely”

“As an engineer educated in atmospheric gases, and as a business manager, I was responsible for 100 of people's lives based on my knowledge of atmospheric gases. I listen to scientists, I cross examine scientists, and I debate the science.

I have never found anyone with logical scientific points based on empirical scientific evidence that shows we have anything to worry about at all. And the basics of this, when you burn a hydrocarbon fuel, you burn molecules containing carbon and hydrogen. With oxygen, they form CO2, carbon dioxide, and H2O, water vapor.

That's it. Carbon dioxide is essential for all life. But, let's go beyond the science and have a look at natural experiment. We've had 2 natural experiments, global experiments in the last 14 years:

The first was in 2009 when the use of hydrocarbon fuels in the recession that followed the global financial crisis reduced. There was less carbon dioxide produced from human use of hydrocarbons. And what did that what happened to the level of carbon dioxide in the atmosphere? It kept increasing.

And what happened in 2020 when we had a a major recession, almost a depression around the world as a result of COVID restrictions placed by governments? We saw the same reduction in hydrocarbon fuel used by humans, the same cut in carbon dioxide output from humans, and yet carbon dioxide in the atmosphere continued increasing.

And, those who understand the science understand that it is fundamental. Humans cannot and do not affect the level of carbon dioxide in the atmosphere. It's controlled by nature entirely.”
