Jun. 22, 2024 7:45 am

Saudi national Omar al-Bayoumi recorded video in Washington over several days in 1999. The video raises new questions about Saudi Arabia's role in 9-11.

Chris Cuomo played video on Friday night that shows a Saudi official plotting the 9-11 attacks that killed 3,000 Americans.

The video aired on News Nation and shows a Saudi official plotting the attack in Washington DC.

This is the first time The Gateway Pundit has seen this video.

Chris Cuomo: There's a story that's out right now that you have not been smothered with today. The more I think about it, it has been eating at me all day about how blanked up this is. We all remember 9/11. I guess we remember. Maybe we don't? Maybe we don't. Maybe time does heal all wounds unless you were directly affected, like the families who are forever scarred and the families of the first responders, etc.

But this CBS video, well, it's CBS just got a video that supports an allegation that was made in a lawsuit by the 9/11 families that it wasn't just about Osama bin Laden, not just Al Qaeda. This guy is a Saudi official, and that the Saudi government was involved.

Now, is this the first time we've ever heard this? No, but we've never given a damn. That's the part that just finally slapped me today as someone who supposedly cares about what happened that day because I lost so many people I knew and we would never forget, and all these things.

In the CBS video, Omar al-Bayoui, whom the FBI says was a Saudi operative. In the video al-Bayoui is seen casing the US Capitol in Washington DC, the likely target of the Flight 93 operation that was thwarted that day by American passengers and heroes.

The video was found by British police during a raid on Bayoumi's UK apartment days after the 9-11 attacks.

The film is just being released now. Why is that? It's been over 20 years since the horrific attacks!

British police found the video during a raid on Bayoumi's U.K. apartment in the days after 9/11. They also seized Bayoumi's hand-written address book that the lawyers for the 9/11 families say was filled with phone numbers of numerous senior Saudi officials who were in the government at the time.

When Bayoumi recorded the Washington video, he was often with two Saudi diplomats who the FBI says had "ties to al Qaeda," a finding the Saudi government disputes.

Retired FBI agent Ken Williams led the 9/11 investigation in Phoenix, where one of the hijackers attended flight school. He believes the Bayoumi video "ranks right at the top of the pile" of evidence. Williams strongly disagrees with the Saudi government's stance that the video was one Bayoumi took as a tourist.

The British police are believed to have turned over the video to the FBI shortly after 9/11, which raises the question: why, after more than 20 years, is it just now surfacing?

"If that was missed then shame on us for missing it," Williams, who is also a consultant on the case filed by the 9/11 families, said. "If it wasn't missed, then I would have to ask the question: What was done with it?"

Here is the video report from CBS.
