

# Aborted Fetal Cells in Vaccines (what this REALLY means is, babies were born alive & organs removed while they were alive to get these cells, murdering them, YES IT'S TRUE)

Human cell lines from murdered babies are in the Hep A, MMR, chickenpox, shingles, covid vaccines, and more.

*Caryn Lipson of Frontline News wrote about the horrific reality of the cell lines from killed babies used in vaccines, in 2021. Here is most of her article - link to original below:*

## ***Aborted fetal cells and vaccines - a scandal much bigger than Pfizer's whistleblower ever imagined***

The use of aborted fetal cells in vaccine production has been going on for over 50 years, starting in the mid-to late 1970s.<sup>[8]</sup> Antigens for several childhood vaccines are grown in aborted fetal cell lines MRC-5 and WI-38. These cell lines are found in the vaccines and are included in CDC's vaccine excipient list as well as Johns Hopkins Institute for Vaccine Safety website (top and bottom images respectively).<sup>[9]</sup>

Hep A (Havrix)	01/2021 <sup>(b)</sup>	MRC-5 cellular proteins, formalin, aluminum hydroxide, amino acid supplement, phosphate-buffered saline solution, polysorbate 20, neomycin sulfate, aminoglycoside antibiotic
MMR (MMR-II)	12/2020	sorbitol, sucrose, hydrolyzed gelatin, recombinant human albumin, neomycin, fetal bovine serum, WI-38 human diploid lung fibroblasts
MMRV (ProQuad) (Frozen: Recombinant Albumin)	01/2021 <sup>(b)</sup>	MRC-5 cells including DNA and protein, sucrose, hydrolyzed gelatin, sodium chloride, sorbitol, monosodium L-glutamate, sodium phosphate dibasic, recombinant human albumin, sodium bicarbonate, potassium phosphate monobasic, potassium chloride, potassium phosphate dibasic, neomycin, bovine calf serum, other buffer and media ingredients
Varicella (Varivax) Frozen	01/2021 <sup>(b)</sup>	sucrose, hydrolyzed gelatin, sodium chloride, monosodium L-glutamate, sodium phosphate dibasic, potassium phosphate monobasic, potassium chloride, MRC-5 human diploid cells including DNA & protein, sodium phosphate monobasic, EDTA, neomycin, fetal bovine serum

Aborted Fetal Cells in Vaccines from CDC Pink Book Excipient List  
<https://www.cdc.gov/vaccines/pubs/pinkbook/downloads/appendices/b/excipient-table-2.pdf>

DNA	Residual Medium	Flublok	Influenza	≤10 ng
DNA	Residual Medium	Flublok Quad	Influenza	≤10 ng
DNA	Residual Medium	Flucelvax Quad	Influenza	≤10 ng MDCK cell
DNA	Residual Medium	Ixiaro	Japanese Encephalitis	≤200 pg/mL ('host cell DNA')
DNA	Residual Medium	ProQuad	MMRV	Residual component of MRC-5 cells
DNA	Residual Medium	RotaTeq	Rotavirus	Residual component of manufacturing process
DNA	Residual Medium	Shingrix	Zoster	≤2.1 pg
DNA	Residual Medium	Vaqta	HepA	<4 x 10 <sup>-6</sup> mcg
DNA	Residual Medium	Varivax	Varicella	Residual component of MRC-5 cells
DNA	Residual Medium	Zostavax	Zoster	Residual component of MRC-5 cells

DNA found in vaccines - Johns Hopkins Institute for Vaccine Safety  
<https://www.vaccinesafety.edu/components-Excipients.htm>

Fetal DNA and proteins are also found in the Covid-19 vaccines, at least for the ones which were developed, not just tested, in fetal cells. Genetic engineer, Dr. Theresa Deisher, explains that it is impossible to totally separate the antigen from the medium it is grown in. Listen as she explains:

<https://www.bitchute.com/video/jpp8fUMY1ly9/>

Deisher explains:

*All of these things are in the final product including contaminants from the cell lines that are used to manufacture the vaccines, and you asked, you know, why the contaminants can't be removed. So, the virus in the vaccine is just a long chain of RNA or DNA, but it's such a long*

*chain that it's not economical to make it in a test tube and so the companies mimic nature's way of growing viruses and they infect cells and the virus grows in the cells, and then they lyse the cell and they try to purify away the virus and leave behind the cells impurities and DNA fragments. But, for anyone who's taken chemistry, your yield is inversely related to your purity and, so, if they purified out the contaminants from the cell lines, the yield would be so low that they wouldn't make any money, or no one would pay a thousand dollars or ten thousand dollars for a vaccine and, so, because of that, contaminants from the cell lines, and in that case fetal cell lines, are in the final product. And, they are actually at very high levels*  
... [10]

The WI-38 and MRC-5 cell lines are over 60 years old. “The WI-38 cells were derived by Leonard Hayflick in 1962 from the lung of a 3-month female fetus [2]. The initials WI refer to the Wistar Institute, a body of the University of Pennsylvania, Philadelphia, and number 38 to the fetus from which the cells were obtained. The MRC-5 cells were obtained in 1966 from the lungs of a 14-week male fetus [3]. The initials MRC indicate Medical Research Council, a body from London.” The cells lines age and can only be replicated so many times, therefore, in 2015, China developed another fetal cell line, the WalVax-2 strain. [11],[12]

These are the approved US vaccines containing aborted fetal cells: [13]

Adenovirus		Barr Labs., Inc	WI-38
Chickenpox	Varivax	Merck & Co.	MRC-5 & WI-38
Diphtheria, Tetanus, Pertussis, Polio, HIB	Pentacel	Sanofi Pasteur	MRC-5
Hepatitis A	Havrix	GlaxoSmithKline	MRC-5
Hepatitis A	Vaqta	Merck & Co.	MRC-5
Hepatitis A-B	Twinrix	GlaxoSmithKline	MRC-5
Measles, Mumps, Rubella	MMR II	Merck & Co.	WI-38
Measles, Mumps		Merck &	MRC-

Measles, Mumps, Rubella, Chickenpox	ProQuad Co.	Merck &	5 & WI-38
Rabies	Imovax	Sanofi Pasteur	MRC-5
Shingles	Zostavax Co.	Merck &	MRC-5

---

The use of aborted fetal cells raises tremendous ethical, moral, and health concerns.

Dr. Stanley Plotkin, a renowned vaccinologist, was deposed in January 2018, by attorney Aaron Siri, prior to testifying in a divorce case, where the parents disagreed about vaccination. Plotkin has a very long list of credentials including Emeritus Professor of the University of Pennsylvania, and Adjunct Professor of the Johns Hopkins University. He has received numerous honors and has lectures named for him. He developed the rubella vaccine, is codeveloper of the pentavalent rotavirus vaccine, and has worked extensively on the development and application of other vaccines including anthrax, oral polio, rabies, varicella, and cytomegalovirus. He is now a consultant to vaccine manufacturers, biotechnology companies and non-profit research organizations as principal of Vaxconsult, LLC.<sup>[15]</sup>

Listen to what Plotkin said about aborted fetal cells during the deposition (beginning at 2:40):<sup>[16]</sup>

JAN 11 2018 17:16:54

# Stanley Plotkin MD

Widely recognized as a leading authority in vaccinology

## Ingredients

<https://www.bitchute.com/video/WFwwoFYbLFd3/>

*Because living tissue is needed for the primary culture, these abortions are often done by the “water bag” method which delivers the fetuses (between 2-4 months gestation) alive. (Limbs, organs, and tissues from aborted fetuses are also a mainstay of modern medical research.) Included in vaccines for measles, mumps, rubella, chicken pox, shingles, rotavirus, adenovirus and rabies are human DNA fragments ...<sup>[17]</sup>*

Not only are the babies delivered alive, horrifically, their organs are often removed when they are still alive.<sup>[18]</sup> This is how they got the HEK293 kidney cells used in the

manufacture of the vaccines and why Pfizer wanted it to remain a secret:

*The details of HEK293's brutal – and from all appearances, until very recently, largely undisclosed – origins explain the company's deep discomfort. Contrary to nearly a half-century of misrepresentation and obfuscation, HEK293's creation did NOT arise from an "abortion" as everyday people understand it.*

...

*To harvest a viable embryonic kidney ... **sufficiently healthy children old enough to have adequately-developed kidneys must be removed from the womb, alive, typically by cesarean section, and have their kidneys cut out.** This must take place without anesthesia for the child, which would lessen the viability of the organs.*

...

*The deliberate killing of an unwanted child (a little girl, in the case of HEK 293) took place in the tortuous manner it did precisely to obtain her organs for research. **The harvest of her organs was the direct cause of her death, prior to which, she was a living child, outside the womb.**<sup>[19]</sup>*

The vaccines were made by destroying lives in the most brutal way and the use of these vaccines seriously harm many who have received them, even though the damage may not be recognized as such.

*... According to Plotkin, injecting intact DNA is theoretically problematic which is why they fragmented it. Intact human DNA was recently discovered in a vaccine by Corveleva, an independent lab that has been analyzing vaccine contents.*

*Clinical trials for vaccines look primarily for predefined local and transient adverse events so trial participants are only followed for days or months. Long term effects of vaccines are not part of the clinical trials. Section 13 of each vaccine package insert states that the vaccine has not been studied to determine if the vaccine can cause genetic mutations, cancer, or impaired fertility. They are not required to. However, scientists have long known that:*

- *DNA fragmentation is a necessary first step to inserting foreign DNA into cells.*

- *Through a process called insertional mutagenesis, foreign DNA can be incorporated into a host DNA and cause genetic mutations, cancer, and other health problems.*
- *Homologous recombination, another type of mutation involving DNA fragments, can cause serious illness.*
- *Retroviruses found in foreign human DNA can be dangerous when incorporated into the DNA of a human host.*
- *The embryonic stem cells in which the vaccines are grown are naturally tumorigenic. The FDA has been studying live virus vaccines because of their potential to cause cancer.*

*Scientists investigating vaccines have been able to identify increases in autism in different countries that coincide with their introduction of live virus vaccines grown in human cell substrates. This is in addition to the previously known problems arising from injecting foreign human DNA into a human host. While the effect of injecting males with DNA from female fetuses and females with DNA from male fetuses has not been directly studied, a new study does show that autistic individuals are more likely to be transgender and research has investigated the effect of chromosomal abnormalities on areas of the brain related to sexual behavior. This is particularly important in light of the tremendous increase in transgenderism and gender dysphoria (confusion) being reported in many countries ...<sup>[20]</sup>*

*Project Veritas exposed Planned Parenthood's trafficking in aborted baby parts<sup>[34],[35]</sup> (Bill Gates' father was head of Planned Parenthood<sup>[36]</sup>), yet, aborted fetuses are a commodity, used for medical research,<sup>[37],[38],[39],[40]</sup> in cosmetics, and even by the food industry for taste-testing purposes when developing new food products.<sup>[41]</sup>*

At the beginning, this cell line was mainly applied for the production of human adenovirus vectors for use in vaccine development and gene therapy, and further optimization makes PER.C6 become a superexcellent host cell line for large-scale industrial production of therapeutic proteins, especially the human IgG."

[18] Fetal tissue and body parts from aborted babies are used for many types of research, not just vaccines. Below is an excerpt from Fetal Body Parts Used for Research: Is it ethical to experiment on aborted humans?

(<https://web.archive.org/web/20190112230628/https://investigatemagazine.co.nz/2451/fetal-body-parts-used-for-research/>)

by investigative journalist Ian Wishart, about how fetal parts are acquired from abortions and evidence that some fetuses are dissected when still alive. The scientists using these body parts believe that it is for the greater good. Yet, the author posits: "It is a modern, relativistic idea that you can sacrifice the few for the good of the many. Indeed, this was one of the justifications Hitler used in whipping up hatred against Jewish, Gypsy and gay minorities. In 21st century form, the argument is more subtle: that if a cure for crippling diseases can be found by harvesting fetal organs from abortions, or growing human embryos in the laboratory for stem cell harvesting, then the deaths of those infants are justifiable because of the perceived

greater good to the community at large. ... “At the Nuremberg War Crimes trials, evidence was presented of horrific scientific experiments being performed on captives in the concentration camps. The Nazi medics on trial attempted to justify it by saying the test subjects were due to die anyway and the knowledge gained would benefit the rest of humanity. [Scientists working with fetal cells from aborted babies claim that the babies were going to be aborted anyway because of maternal choice. RS 613] “Human DNA in Vaccines - Origins and Safety”. P.S. Don't think that the unbelievable savagery of live baby dismemberment isn't still happening. It is! 😭😭😭😭😭😭

*(Caution, trauma alert if you read further.)*

*I first became aware of this a number of years ago, when I read a petition with the bone-chilling facts. It said: "Do you know how they abort babies? When they are very young, they scald them alive with saline. A woman survived the saline death and struggles with chronic health problems. When the baby is a little older, the doctor tears them limb from limb. Then he squashes their head. Then the baby comes out of the mother's body in pieces. The babies scream! If they are born alive, the doctor snips their spinal cord with scissors to kill them. Some babies are dumped into a pail, still alive, screaming."*

*I researched and found this to be true.*

The horrifically evil people who support these things tell the world that they are *kind*.

I am not a paid subscriber but would like to contribute something; I very much appreciate your work. Your efforts deserves compensation.

Could you include a "Buy Me A Coffee" button? I could buy a few coffees at a time; I simply cannot afford all the subscriptions that I think are important and/or the writers whom I wish to support.

As small as the amounts are, several people buying coffees can add up for you.

My other option is to subscribe for a month (or two) and then cancel. It's cumbersome doing that but I may consider that approach; it's a way of expressing my appreciation for your work with more than words.

Thank you for all your research. I wish I had known all this when I had my son. Prior to Covid I just went along childhood vaccination schedule but stopped when my son was 4 now he is 7. It makes me so upset knowing the moral corruption, greed and dangers behind the broad vaccine industry
