

The Rockefellers created 990 "Climate Change" institutions, foundations, and activist groups

Every time you hear a "climate change" scare story, that person was PAID. He is a Rockefeller stooge. He may not know it; but his profession has been entirely corrupted

This is the most public of their estates, but trust me on this, Rockefeller houses, mansions, lodges, city palaces, beachfront estates, and dozens upon dozens of holiday houses litter America.

In the climate change arena, the Rockefellers call the shots. The whole thing was their idea, they took a silly but interesting theory and amped it up with hundreds and

hundreds of million of dollars. They founded institutions and linked the survival of those institutions to promoting climate change and population reduction. They adopted one likely politician after another.

Buy the book [here](#)

The Rockefellers have created 990 Climate Change activist organizations. They give them directions, financing, and launch them on the world. The Green Movement was started, financed, organized, and militarized by the Rockefellers. By the late 40's the family was all in, on the same page. In the 50's they began to stand up countless institutions, committees, university departments, university institutes, foundations, and policy shops gathered around this one idea, as below:

Man is now degrading his environment at a terrifying rate. The cumulative effects of advancing technology, massive industrialization, urban concentration, and population growth have all combined . . . not only to create imminent danger to the quality of human life, but even to pose threats to life itself.

—Rockefeller Foundation, 1969 Annual Report

Let's just pause here and recognize that the United States and Canada are 5% developed. If it were 50%, then maybe we would have reason to worry about the effects of trace gas that takes up .04% of the atmosphere, of which 3% is currently contributed to by humans. But were we to have that level of development, our science would have long ago solved the problem. Our sense of proportion, size and consequence has been twisted, propagandized via hundreds of billions of purposed dollars. And all of it is exaggerated science done by scientists compromised by Rockefeller money.

By 1998, the Rockefeller family had swept the table clean of any opposition to this one idea. Any scientist not on board with the agenda was imperiled. Any university department not working towards this one artificial goal, was in danger of being marginalized. Infiltration had begun into every media organization, every entertainment division of every major corporation. This, as stated below, would be a generational goal. For everyone. Or get off the bus.

Global climate change is one of the emerging trans-national threats to peace, justice, and sustainable development that have moved closer to the top of the international security agenda since the end of the Cold War. Like other cross-border challenges — crime and terrorism, infectious disease and the strains of gross economic inequity—its management will require collaboration and social innovation at all levels of human activity.

—Rockefeller Brothers Fund, 1998 Annual Review

The Rockefellers have created 990 Climate Change institutions, foundations, and activist groups. And they fund them.

What is evidentiary, what can be proved in a court of law, rather than opinion, however, is that the Fabians started the idea of this whole one-world, no nation state. It is clear too that after the First World War, the Fabians roped in the second generation of Rockefellers. It was a major catch. It meant they had America. And it was spiritual. It was meant to change mankind, to kill off Homo Sapiens and turn us to Homo Universalis.

The New Man would be not-Christian, quietist, and self-obsessed. The economy would trend towards zero-growth if not de-growth. There is a preponderance of data, many many publications that laid out their plans. They twisted education away from practical science, engineering and building things towards social movements, the humanities, the

arts, and pleasure. And via Laurance Rockefeller's money and organizational skill, they devised and invented the discipline of cybernetics from which the internet flows.

The first Rockefeller, as almost everyone knows, was John D., by all accounts a deeply unpleasant individual who, after his private army killed protestors, was advised to go into charity in a big way to rescue his reputation. Which he did, and managed to dodge the trustbusters and Teddy Roosevelt, and build his empire over the corpses of his competitors. And then, as advised, he began to buy the media. The Luce empire of Time-Life fell into step. From the 60's on Time-Life stood astride the media world, attracting the best, the authority on every subject. I was trained there, and trained well, but all the writing was done back in New York, in the Time Life building in Rockefeller Center. It was massaged to fit the message. I wanted to write and left.

By the second generation, the family had found its purpose, the meaning for all the wealth, the path forward. John D., according to Sir Stephen [Wilkinson](#), who has studied him all his life, believed to his core that God had favored him with so much wealth because he was good; his Baptist faith coupled with titanic wealth made him a modern priest. His family, his heirs, would be a Royal Priesthood leading mankind to a new paradise. How the family must have fallen upon the Fabians, with their starry titled members, Bertrand Russell, all the Huxleys, H.G. Wells, Emmeline Pankhurst. How seductive socialism is to the intellectual class. It gives them the right, being so smart, to order humanity. To choose for the rest of us. Few of them could run a corner store.

The seduction of great wealth is pretty much irresistible. Everyone falls. The last time I was "in society" was at a wedding [hosted](#) by the Bostonian Cabots - so ancient they arrived in the New World in 1498. Famously, "The Lodges only talk to the Cabots and the Cabots only talk to God." That's how grand they are. Their wealth spread out that weekend was like entering heaven, everything so beautiful, so absolutely perfect in every detail. It was a lush sinking feeling, utterly seductive to the ego. Any Clinton, Gore, Obama, Kerry, Bush, any impoverished scientist, any ambitious university administrator, every fundraiser, every marginalized military man, would just fall over like an ambitious 20 year old faced with her first billionaire. Take me I'm yours.

The Cabots in full regalia

And that's what happened. That's how they did it, by inviting likely servants to their houses and hunting lodges, donating buildings, buying the land for the U.N., funding

organizations, appealing to vanity and greed and above all, the human's desperate need for significance. They created a super-class unmoored to reality and entirely 100% destructive of human life. It was systematic, a fierce, unstoppable, detailed two-hundred-year plan. Each generation would make their contribution.

It started with the felt need to reduce population and turn man into something other. To stress, environmentalism, neo-Malthusianism; the 'saving of the planet' was the motivator for each of the following actions. If you accepted Rockefeller funding, you toed the line. There were too many people, the carrying capacity of the earth was breached, the planet was dying, we need a new form of human. These ideas all came out of the Fabian stable and metastasized through the culture like the most delicious poison. Every intellectual, all the universities started to promote this idea. It was heady, exciting. It celebrated Man, not some faceless distant Deity. Fabians hated Christianity and wanted, above everything, to replace it. But first, they had to command every institution of civil society.

The following is a partial list of the institutions by which the Rockefeller family built the modern world, in every aspect of the culture. It was masterful. Ancient Kings and Emperors would have marveled.

In 1920, John D. co-founded the League of Nations. He was the major donor. It failed because the U.S. refused to sign on. The family began to run for office, in order to manipulate levers of power behind the scenes. Today, there is pretty much always a Rockefeller in power at each level of government.

In 1921, they founded the Council of Foreign Relations, (CFR). David built and donated CFR's headquarters. CFR is closely allied to the Royal Institute of International Affairs (RIIA) in London, Chatham House, itself closely allied with the British Round Table and the Fabians. When people talk about the 13 Families theory, the Round Table and RIIA feature big-time.

In 1944, they co-founded the World Bank, its ideals and purpose devised by the Council of Foreign Relations' War and Peace Studies Committee.

In 1945, they co-founded the United Nations, with the CFR and RIIA. David Rockefeller wrote the preamble to the U.N. Charter. John D. Jr bought the 17 acres for the U.N

building. Nelson chose the architect, Philip Johnson, thereby introducing the International Style. The family funded the U.N. building.

In 1948, came their statement of purpose:

If the world government cause is to triumph it will need more than sympathetic endorsement by the majority. People must be made to feel that their own security, freedom, and prosperity, yes, their own survival, depend on the creation in our time, of a world rule of law. They must be made to believe that the establishment of a World Government is more urgent than the maintenance of a high domestic standard and as, if not more, practical than the pursuit of a deceptive security by full military preparedness. - Atomic physicist, Edwin Rabinowitch, a Rockefeller client/servant, 1948

In 1948, in league with Julian Huxley, Mr. Population, a leading member of the British Eugenics Society and the British Humanist Society, they formed the International Union for the Conservation of Nature, (IUCN). Stated goal: better distribution of the world's population (which is behind the migrant crisis) and fertility control. The IUCN has systematically cleared tens of millions of traditional and indigenous peoples from their lands in Africa and the East.

In 1948, they founded the Conservation Foundation. In 1953, they funded it with \$53 million, the equivalent of \$650 million today.

In 1954, they founded, with Bernhard of the Netherlands (thought to be the apex child predator) the Bilderberg group.

In 1955, they cofounded the International Meteorological Institute (IMI)

In 1959, the first publication of the Rockefeller Institute Press included a section on "*Changes in the Carbon Dioxide Content of the Atmosphere and Sea due to Fossil Fuel Combustion*".

Laurance Rockefeller was purposed with the spiritual arm of the operation. Starting in the late 40's. Laurance founded fifty environmental organizations including the World Wildlife Federation, the World Resource Foundation, the IUCN, and UNESCO.

Laurence is behind Esalen and Lindesfarne Association, and is responsible for coining the term "New Age". He founded and funded the Fund for the Advancement of the Human Spirit, the Foundation for Conscious Evolution, the Conservation Foundation. He was a board member of the National Resources Defense Council, the National Geographic Society, Woods Hole Geographic Society, Resources for the Future, and the Sloan foundation. He was a board member of the Environmental Defence Fund and the WWF. He co-founded the Rockefeller Brothers Fund and served as its chairman from 1958-1979. Laurance Rockefeller founded [Cybernetics](#) as a discipline by funding its study.

This man created the New Age, the climate scare and the Sixth Great Extinction scare

He stood up and funded most of the New Age gurus followed today by tens of millions, if not hundreds of millions. The New Age says “Stay out of the battleground, don’t worry about your neighbor, your family, your town, your country. Worry about your personal spiritual advancement, your tolerance and forgiveness. Work on yourself. Do your [shadow](#) work”, you are everything, everything is a reflection of you.”

He funded the Disclosure Movement, which claims that aliens walk among us, and that their technology, liberated from the Naval Research Labs (another Rockefeller genesis) will save humanity. He was a ferocious, destructive nut.

Next, the family founded, financed and organized the European Commission, OPEC, and the UN Development Program.

In 1973, they founded the Trilateral Commission.

The plans for Princeton's Institute for Advanced Study had been drawn up by Tom Jones from the British Round Table, intended as an American version of All Souls at Oxford which is primarily an academic research institution with particular strengths in the humanities and social and theoretical sciences. The Rockefellers were closely involved via funding the Institute and funding all of its heads and especially, *significant scientists, providing grants for their work.*

Here the science of climate forecasting was developed using climate modelling during the 1950's Initially it was thought that geo-engineering would be the principal method used, rather than reducing emissions. They were math freaks, one of whom made the following convenient prophecy.

Intervention in atmospheric and climatic matters . . . will unfold on a scale difficult to imagine at present . . . this will merge each nation's affairs with those of every other, more thoroughly than the threat of a nuclear or any other war would have done.²⁴

The climate scare well entrained, the family turned their attention to art and architecture. The breaking of architectural tradition was deliberate. Modern

architecture, the International Style was created in order to disrupt and make uneasy Homo Sapiens.

”The International Style suited the Rockefeller brothers’ internationalist aspirations like a glove. It also inspired radically new zoning laws and urban planning models, leading not only to a boxy skyline of rectangular high-rise slivers, but to extensive sprawl and automobile dependency— which also happened to be highly profitable for the oil and auto industries.” (Nordangard)

In New York alone, they commissioned the following buildings, all built to be intentionally unsettling, deliberately destructive. Modernism deliberately erased the the past. It was purposed to make the human walking by and through these buildings, a sense of himself as base, insignificant, submissive and subject.

Some of the Rockefeller-financed buildings:

Rockefeller University

The U.N. Headquarters

Memorial Sloan Kettering Cancer Center

Riverside Church

The Cloisters

Lincoln Center of the Performing Arts

Empire State Plaza in Albany

One Chase Manhattan Plaza

The World Trade Center

Kissinger, then a professor at Harvard, was one of the family’s most treasured assets. He believed “a *new political architecture* would be required, better able to offer long-term

governance.” He became part of Nelson’s “portable brains trust”, the Rockefeller Brother’s fund, the Special Studies Project. The SSP worked from 1956-1961 to build that new political architecture:

Panel I—International Objectives
and Strategies

Panel II—International Security
Objectives and Strategy

Panel III—International Economic
and Social Objectives and Strat-
egy

Panel IV—US Economic and So-
cial Policy

Panel V—US Utilization of Human
Resources

Panel VI—US Democratic Process

Panel VII—The Moral Framework
of National Purpose

They co-founded Woods Hole Oceanographic [Institute](#)

They co-founded the Scripps Institute of Oceanography.

They co-founded the Atomic Energy Commission, the Office of Naval Research, and the National Science Foundation while Nelson Rockefeller was in power.

This is only a partial list. Every single one of these institutions are neo-Malthusian, bent on fewer humans, and taking us off the land into giant pens, controlled, measured and monetized.

In 1989, illustrating the family’s reach abroad, the Hague Declaration (with 24 signatories) called for a new international institutional authority that could preserve the Earth’s atmosphere and fight global warming.

Thereafter, in that same year, 1989, the Rockefeller Brothers Fund under the leadership of David Rockefeller and Henry Kissinger founded the United Nations Panel on Climate Change (IPCC). and funded it with near unlimited resources going forward.

In the appendices of Norgangard's book, he lists all the institutions founded by the family. Skimming them, I found myself jumping out of my desk chair and shouting into the void. The dog vanished, the cat hid. It is infuriating - they used their power to corrupt every institution that would serve their end game. Here is one page.

1921	Council on Foreign Relations	John D. Rockefeller Jr. J. P. Morgan	Rockefeller Brothers Fund Rockefeller Foundation Chevron ExxonMobil JPMorgan Chase Carnegie Corporation German Marshall Fund of the U.S. Ford Foundation MacArthur Foundation Open Society Institute William and Flora Hewlett Foundation United Nations Foundation

1952	Population Council	John D. Rockefeller III Frederick Osborn	Rockefeller Brothers Fund Rockefeller Foundation

The End Game

In 2012, the U.N. Climate Fund announced the establishment of the model for the cities of the future, outside Seoul, Korea called Songdo. Songdo is failing. No one wants to live there. Those who visit describe the place as soulless, with no people, no vivid life. Billions were spent creating it.

Nordangard describes:

The smart city Songdo, South Korea, is built in the International Style, following the outdated urban ideals of Le Corbusier (note the similarity between Posco Tower to the right and the new One World Trade Center in New York).

“Traffic flow and citizen behaviour is monitored in real-time via five hundred surveillance cameras. Household waste is automatically transported via the pneumatic system under the city and converted into energy. All apartments have smart locks, with smart cards which can also be used for loaner bikes, parking, subway, and movie tickets. All apartments have smart meters (enabling residents to compare their energy consumption with that of their neighbors) and built-in cameras everywhere. Floor sensors detect pressure changes and automatically alert an alarm service of a suspected fall. Systems are tested where residents via the TV screen can receive language lessons or communicate with their physician as well as neighbors and relatives, and bracelets for locating children via GPS.⁷ In other words, a futuristic dream straight out of the World Future Society’s 1970s vision—or Orwell’s 1984. And this is South Korea. How successful, environmentally friendly, and inclusive Songdo really turned out to be has been questioned. It was built primarily for an affluent middle class expected to be able to afford the higher standard and the new technology. The electricity comes from coal-fired power plants and the buildings are completely glazed with windows that cannot be opened, which requires air conditioning all year round.⁸ Also, the pneumatic waste disposal system does not always work properly. As of March 2018 there was still no cultural life, no street

vendors or old people, public transport, transport systems were empty and three-quarters of the homes were empty.

Evil has a human face, but despite the billions thrown at the people of the earth, fewer and fewer of us are falling for it. This latest Facebook-hysteria-the-sky-is-falling post from NASA's Climate Change Center, received 5,600 reactions. 5,300, including mine were laughing emojis. And the top comment cited [Torecelli](#), with one man's work refuting every single flatulent government propaganda machine theory. Facebook, remember, is controlled speech and still, the people win.

Unparalleled views of sea level rise 📺🌐🌐

Global sea levels have risen more than 4 inches (102 millimeters) since measurements began in 1992, increasing coastal flooding in some places.

As ocean water warms, it expands and takes up more space. The added heat in the air and ocean is also melting ice sheets and glaciers, which adds freshwater to the ocean and further raises sea levels. ... **See more**

Elizabeth Nickson was trained as a reporter at the London bureau of Time Magazine. She became European Bureau Chief of LIFE magazine in its last years of monthly publication, and during that time, acquired the rights to Nelson Mandela's memoir before he was released from Robben Island. She went on to write for Harper's Magazine, the Guardian, the Observer, the Independent, the Sunday Telegraph, the Sunday Times Magazine, the Telegraph, the Globe and Mail and the National Post. Her first book The Monkey Puzzle Tree was an investigation of the CIA MKULTRA mind control program and was published by Bloomsbury and Knopf Canada. Her next book, Eco-Fascists, How Radical Environmentalists Are Destroying Our Natural Heritage, was a look at how environmentalism, badly practiced, is destroying the rural economy and rural culture in the U.S. and all over the world. It was published by Adam Bellow at Harper Collins US. She is a Senior Fellow at the Frontier Center for Public Policy, fcpp.org. You can read in depth policy papers about various elements of the environmental junta here: <https://independent.academia.edu/ElizabethNickson>

Franklin O'Kanu Unorthodoxy Jul 7

I touched on the Rockefellers at a high level here

(<https://unorthodoxy.substack.com/p/donating-to-a-good-cause-how-billionaires>), but this is an in-depth analysis on the family.

Until we can understand how 'families' operate in the shadows, we will have no idea how history truly plays out. And if we don't know this, then we really have no idea who our true

enemy is: <https://unorthodoxy.substack.com/p/who-are-the-bad-guys-part-two>

Thank you for shining the light at one of these people at play.
