CDC's count: now up to 14 mild human cases in the US. We the people need to spread the word so the globalist authorities become too scared to release a souped up bird flu onto the world

HHS Secretary Becerra just issued a PREP Act declaration for bird flu. This allows the FDA Commissioner to issue EUAs for bird flu vaccines, with no liability.

The US government has ordered 4.8 million doses of bird flu from the CSL Sequirus company, produced in dog kidney cells and using a dangerous squalene-containing adjuvant.

The AMA issued CPT codes for this vaccine last Friday, so doctors could be reimbursed for administering it.

There have been a total of 11 cases of bird flu in the US since 2022, all mild, most involving just conjunctivitis. None were shown to have been transmitted human-to-human.

Why would you need this vaccine, unless you expected a much more virulent virus to appear which had mysteriously gained the ability to spread between humans?

Will there be another lab-derived pandemic? Not on my watch!

NO. NO. NO. NO. NO. There are things worse than death (and even illness), Living in a medical tyranny hellscape is worse than death or illness. I'll take my chances thank you. I will NEVER take another shot for anything as long as I live. They are going to try to make it impossible for us to live normal lives without being "up to date" on all of the pharma soup they require for us. If enough of us say NO we can stop this madness. God help us. I'm so sick of all of this.

"The US government has ordered 4.8 million doses of bird flu from the CSL Seqirus company..." Exactly. Note the possibly inadvertent but quite interesting omission of the word "vaccine" from this statement. How else would our insane self-appointed masters create the next pandemic? And since the alleged bird flu virus doesn't exist, do you really think that the "vaccine" will be free of whatever toxin(s) cause birds to exhibit flu-like symptoms, plus whatever else they need to make humans sick?
