

The H5N1 Bird Flu is a Global Attack on Animals and Humans

The FDA's Jerry Weir literally presented a slide with the subheads, "Pre-pandemic, Inter-pandemic, and Pandemic" for the upcoming 'naturally and spontaneously occurring H5N1 pandemic.'

KAREN KINGSTON
NOV 17, 2024

November 17, 2024: The CDC, NIH, FDA, USDA, ASPRA, BARDA, other 3-letter federal agencies, the WHO, and global governments have quietly been deploying a locked and loaded H5N1 pandemic across poultry chickens, egg hens, dairy cows, and other animals. The USDA (US Department of Agriculture) and CDC are now reporting that the 'highly deadly H5N1 virus' (which has no symptoms in animals) has jumped to humans, even though humans have minimal to no symptoms.

The Kingston Report
KarenKingston.Substack

Dr. Demetre C. Daskalakis

Thanks for that question. So on, the severity, again, what we've been seeing in the United States is extremely mild symptoms. So again, ranging from moderate to mild conjunctivitis, and some people also experiencing mild respiratory symptoms, and also some with constitutional symptoms, like there have been some folks with fevers you know, I think that there are a couple of hypotheses, which is all that we can really provide as to why there's a difference in severity. One, you know though, though H, all, H, 5n, ones are not built the same. So these are actually potentially different genotypes. So we know that there's sort of different clades and genotypes circulating. So what we have in the US at this point has only caused mild illness. Also, there could be issues related to the populations that are exposed to the virus, as well as to the magnitude of the exposure. So again, all hypotheses. So we don't have a very clear answer, but from the perspective of what we're seeing in the US, everything has been mild.

The Current H5N1 Pandemic is a Global Attack on Our LiveStock and Us

Over the past several weeks, I've done interviews on **InfoWars** with Maria Zeee, **USAWatchdog** with **Greg Hunter**, **The Absolute Truth** with **Emerald**, **WorldViewTube** with **Brannon Howse**, **Laura-Lynn Thompson**, **Kate Dalley**, **Jim Ferguson**, and **The Onward Podcast** with **Brett Hawes**, to discuss the ongoing culling of livestock by US federal agencies and global governments under the guise of public health protection against H5N1.

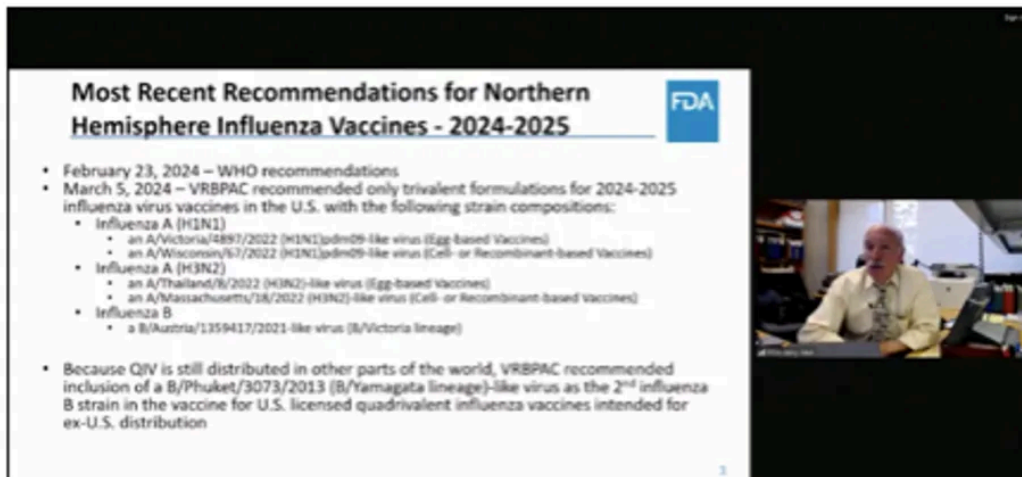

If you want to understand the details of how the US and global governments are currently using the H5N1 Bird Flu to attack our animals, food supply and citizens, I highly recommend watching the full 75-minute interview with **Brett Hawes on the Onward Podcast**.

FDA Announces They Will Fully Approve H5N1 Vaccines *Without* Receiving *Any* Safety or Efficacy Data

*“The scenario assumes that any strain changes recommended by VRBPAC would be implemented during a declared pandemic, but **would not require clinical data prior to the approval...** In any case during the pandemic we would use the strain change **and the safety, immunogenicity and even effectiveness data will come post-approval.**”*

 KarenKingston.Substack

Most Recent Recommendations for Northern Hemisphere Influenza Vaccines - 2024-2025 

- February 23, 2024 – WHO recommendations
- March 5, 2024 – VRBPAC recommended only trivalent formulations for 2024-2025 influenza virus vaccines in the U.S. with the following strain compositions:
 - Influenza A (H1N1)
 - an A/Victoria/4897/2022 (H1N1)pdm09-like virus (Egg-based Vaccines)
 - an A/Wisconsin/57/2022 (H1N1)pdm09-like virus (Cell- or Recombinant-based Vaccines)
 - Influenza A (H3N2)
 - an A/Thailand/6/2022 (H3N2)-like virus (Egg-based Vaccines)
 - an A/Massachusetts/18/2022 (H3N2)-like virus (Cell- or Recombinant-based Vaccines)
 - Influenza B
 - a B/Austria/1359417/2021-like virus (B/Victoria lineage)
- Because QIV is still distributed in other parts of the world, VRBPAC recommended inclusion of a B/Phuket/3073/2013 (B/Yamagata lineage)-like virus as the 2nd influenza B strain in the vaccine for U.S. licensed quadrivalent influenza vaccines intended for ex-U.S. distribution

- Jerry Weir, PhD, Director CBER/FDA

Per Dr. Jerry Weir, FDA Director of the Division of Viral Products (DVP), the FDA will provide full FDA approval of highly dangerous, disease causing ‘virus vaccines’ for the 2025 H5N1 pandemic without receiving any safety or efficacy data in animals or humans.

In this 2-minute clip. Brett and I dive into the FDA documents *clearly articulating* that the FDA will provide full FDA approval *without receiving any data*.

The screenshot shows a video call interface. At the top center is the 'ONWARD' logo. On the left is a slide with the following text:

FDA may require clinical immunogenicity and safety data be provided post-approval.

The Kingston Report
KarenKingston.Substack

In the event of a pandemic, and following WHO and VRBPAC recommendations, manufacturers of U.S.-licensed prototype pandemic vaccines would submit a "strain change supplement" for regulatory review of their updated pandemic vaccine, including complete chemistry, manufacturing, and control information for the updated vaccine to ensure product quality and consistency; and nonclinical data to support effectiveness of the updated vaccine. FDA may require clinical immunogenicity and safety data be provided post-approval. Sponsors should expect FDA to seek their involvement in working with FDA and other governmental agencies on plans to collect additional safety and effectiveness data, such as through epidemiological studies, when the vaccine is used. The additional data may allow a better understanding of the relationship between immunogenicity of the vaccine and clinical effectiveness. (See [Clinical Data Needed to Support the Licensure of Pandemic Influenza Vaccines | FDA](#))

At the bottom of the slide, a black box contains the text: **may require the immunogenicity data,** and the URL onwardpod.substack.com.

On the right side of the video call, there are two video thumbnails. The top one shows a man speaking into a microphone. The bottom one shows a woman with dark hair smiling.

These are the FDA documents I'm referring to in the video clip

FDA may require clinical immunogenicity and safety data be provided post-approval.

We're Currently in the Inter-Pandemic Phase of the H5N1 Pandemic

Jerry Weir literally presented this slide with the subheads, “Pre-pandemic, Inter-pandemic, and Pandemic” for the upcoming ‘naturally and spontaneously occurring H5N1 bird flu pandemic.’ (heavy sarcasm).

The full interview can be viewed on [The Onward Podcast](#).

BREAKING: Bird Flu Update

Are we looking at a bird flu pandemic in the very near future? It’s certainly starting to look that way. On today’s show, Karen Kingston returns to discuss some critical developments surrounding the H5N1 bird flu virus, looming pandemic preparedness, and concerning new policies impacting both our health and food systems...

It's Time for Us to Prepare

In case of a long-term power outage or shortage in our food supply, I've stocked on **No Labs Beef** as a reliable and nutritious source of *real beef* for me and my loved ones.

No Labs Beef

No Labs Beef is 100% freeze dried beef with NO added ingredients or chemicals (not even salt, so it's low-sodium).

NoLabsBeef.com
 Use code **KINGSTON15** and Save **15%**
 Plus! **FREE Shipping**

Due to their proprietary freeze dried process, [Prepper Beef: No Labs Beef](#) is a great source of shelf-stable protein lasting for 10 years.

No Labs Beef is nutritious, high-protein, non-mRNA, *real beef* and the perfect ingredient for delicious soups and stews containing up to 30 grams of protein per serving.

Go to [No Labs Beef](#) and enter code **KINGSTON15** at checkout to *save 15% plus FREE shipping.*

Proverbs 21:20

The wise store up choice food and olive oil, but fools gulp theirs down.

CDC - Certain Death Coming. A more despicable organization laden with self-absorbed, over-educated, soulless, black-eyed, utterly useless fudge brains you shall not find.....well, FDA, WEF, WHO, NATO, etc.....I stand corrected.

Thank you, Karen! As I posted the documents the other day, this had been planned for over 18 years.

Will this be the one that brings in the Great Rest with an economic meltdown? Who knows?

So, let's expose this and pray like never before!!!!!!!!!!!!!!!!!!!!
