Joe Rogan, in a new episode of his hit podcast, The Joe Rogan Experience, released on Thursday, highlighted the damning findings from the House Oversight Committee’s latest COVID-19 report.

The House Select Subcommittee on the Coronavirus Pandemic on Monday released a report titled “After Action Review of the COVID-19 Pandemic: The Lessons Learned and a Path Forward.”

A summary of the 525 pages

— Select Subcommittee on the Coronavirus Pandemic (@COVIDSelect) December 2, 2024

Their findings further verified theories about gain-of-function research in China and the lab leak theory; exposed waste, fraud, and abuse of COVID relief funding; revealed how federal and state agencies, including the CDC and NIH, enforced pointless, unscientific recommendations that damaged our country's health and economy; and highlighted how the government "ignore[d] natural immunity" and mandated the ineffective COVID vaccine while it "failed to properly inform the public about vaccine injuries" and is still failing to provide compensation for the vaccine-injured.

The report also highlights how New York Governor Andrew Cuomo and his Administration "worked to cover up the tragic aftermath of their policy decisions in an apparent effort to shield themselves from accountability" after forcing nursing homes to accept COVID-19-positive patients.

Joe Rogan reacted to the bombshell report with Canadian YouTuber and More Plates More Dates host Derek Munro, noting that the committee "basically said all the conspiracy theorists were correct." He then slammed leftist MSNBC hack Rachel Maddow for helping to cover up the truth about the virus.

It can be recalled that Rogan came under intense scrutiny from the radical left and the fake news for questioning the efficacy of the COVID-19 vaccine and taking Ivermectin to treat his case of COVID.

Rogan: The House released a 500-page report on COVID-19 pandemic key findings: COVID-19 likely originated from a lab-related incident in Wuhan, China. Crazy! You get banned from YouTube for saying that, banned.

Over \$200 billion in relief funds lost to fraud, with criminals exploiting weak oversight. Prolonged lockdowns and arbitrary mandates caused severe harm, economic devastation, mental health crises, and historic learning loss while lacking robust scientific support. Policies ignored natural immunity, pushing mandates that eroded trust and harmed public perception of science. Absolutely. WHO and CDC compromised by political interference, offering inconsistent, unscientific guidance that fueled public distrust, and the key players included federal agencies. And Cuomo's administration actively obstructed oversight efforts and hid critical evidence.

Select Subcommittee on the Coronavirus Pandemic basically said all the conspiracy theorists were correct, every single one of them. No repercussions, no retractions, no apology from Rachel Maddow, none of it.

In addition to the House report, The Gateway Pundit reported that in another bombshell legal win, the United States District Court for the Northern District of Texas ruled against the Food and Drug Administration (FDA) in a high-profile case brought by the Public Health and Medical Professionals for Transparency (PHMPT).

The decision mandates the FDA to release the Emergency Use Authorization (EUA) file for the Pfizer-BioNTech COVID-19 vaccine no later than June 30, 2025.

Hopefully, with the incoming Trump Administration, we will continue to learn the truth about COVID-19 and the corrupt practices of federal agencies.
