Glenn Greenwald hosts Mike Benz to dissect USAID’s deep involvement in global political influence, censorship, and the use of NGOs for U.S. foreign policy objectives.

Imagine a world where humanitarian aid serves as a cover for geopolitical strategy.

USAID, often perceived as a mere aid organization, is revealed to be intricately linked with CIA operations, influencing political processes and even funding programs to advance U.S. interests under the guise of humanitarian efforts. This dual-purpose approach has sparked significant debate, especially as figures like Elon Musk and Donald Trump scrutinize its operations for efficiency and alignment with national interests.

“... there is not an inch of daylight between USAID and the State Department, and USAID exists as an illusion to fool you into thinking that USAID is not the State Department, but it is. The only reason it’s an independent agency is because that gives aid workers access to areas state can’t access directly.
