

# Cheat-by-mail

TIERNEY'S REAL NEWS

APR 03, 2025

Share

In early 2019, I did extensive research on absentee ballot fraud in America and prepared a 182-page presentation on it. I rented out libraries in Minnesota and gave VOTER FRAUD SUMMIT to hundreds of people to educate them on what I learned about ballot harvesting and absentee ballot fraud. People were shocked by what I learned and what I presented.

I knew that the RINOs and Democrats had used cheat-by-mail to steal the 2018 midterms and, frankly, the entire state of Minnesota - and were obviously planning to expand it to steal the 2020 election and every election after that. That became very apparent when COVID was unleashed and used to justify staying home and voting mail.

I was right and the first, that I know of, to say it out loud. I gave my work to the Lindell Team and was told that the Republican Party in Minnesota sent my work to the White House. I have no evidence that ever happened but I hope that it did.

Then, I got banned on X and Facebook for over two years for my efforts. So, what do I do next? I started the newsletter called **Tierney's Real News** on another platform and eventually transferred my work to **Substack**. That newsletter is what you are reading right now.

In other words, I was the first to point out massive absentee ballot fraud, the first to state that the Democrats were going to use COVID to accelerate cheat-by-mail fraud in 2020 and the first to be shut down on social media for warning America.

This is what I wrote in my **newsletter** on March 22, 2020. I was correct and the FIRST ONE to predict this:

Democrats hope to hype the Wuhan virus for months to destroy the economy, bring down the market, shut down Trump rallies, gatherings, debates, the conventions & force ALL voting by mail or phone! They basically said that tonight on MSNBC & CNN. Democrats are masters at rigging absentee ballots!

You can find all my old election fraud research here and download my 2018 presentation if you like (at the end of this link:)

Why am I telling you this again now? Because it is SIX YEARS LATER and the absentee ballot fraud is STILL GOING ON in many states. And, I am being shut do ONCE AGAIN on Twitter (X) and Facebook for telling you the truth about it. Like clockwork.

Cheat-by-mail was just used to STEAL the WISCONSIN Supreme Court race and u a few months ago to STEAL US SENATE SEATS in Wisconsin, Arizona, Michigan, Nevada & Pennsylvania and many US House seats in blue states.

Seth Keshel - an accomplished election fraud data guy - agrees with my assessment about absentee ballot fraud in general, and in particular for the latest race in Wisconsin. It was obvious, if you tracked the results in real time, like I did, that the were using an algorithm to FEED ABSENTEE BALLOTS into the system so that th Democrat Crawford stayed ahead all night - after the Republican started out ahead.

The result in the Wisconsin Supreme Court race MIRRORED what happened in 20:

**Gary @plzbepatient · 9h**  
 This graph gnaws at me because it's so clear what happened now.

**The state of the race in Wisconsin**  
 Total presidential votes for each party so far, with 89 percent of Wisconsin's expected vote counted as of 6:23 a.m on Nov. 4

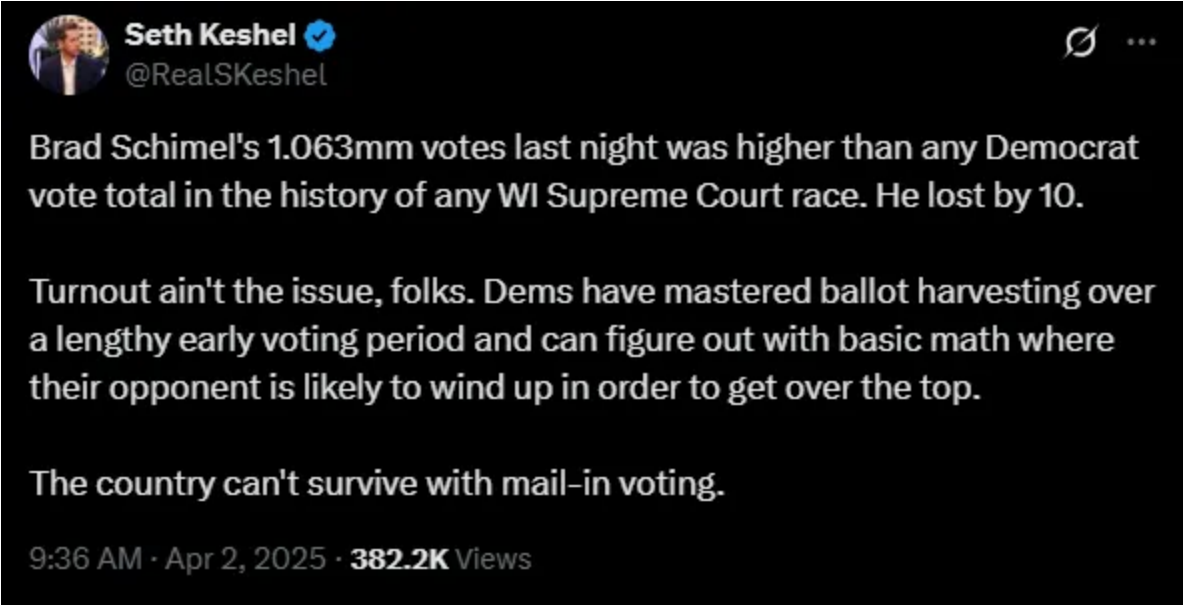

Expected vote totals are generated by Edison Research and estimate turnout based on historical trends, predicted changes in turnout, and the total number of votes cast in counties that have reported all votes. The totals will be adjusted throughout the counting process.

**Trump vs. Biden vote totals in Wisconsin (N = 315)**

**8:44 PM · 4/1/25 · 123K Views**

And the data result was a COPYCAT of the same result for the last Supreme Court election in 2023. In other words, they feed absentee ballots into the system, using an algorithm, where they are needed to win - based on a previous result.

The data I'm looking at is showing absentee ballots being fed into the system to keep liberal Susan Crawford ahead at a certain rate.  
  
... almost as if an algorithm was at work.

 **Seth Keshel** ✓  
@RealSKeshel

Brad Schimel's 1.063mm votes last night was higher than any Democrat vote total in the history of any WI Supreme Court race. He lost by 10.

Turnout ain't the issue, folks. Dems have mastered ballot harvesting over a lengthy early voting period and can figure out with basic math where their opponent is likely to wind up in order to get over the top.

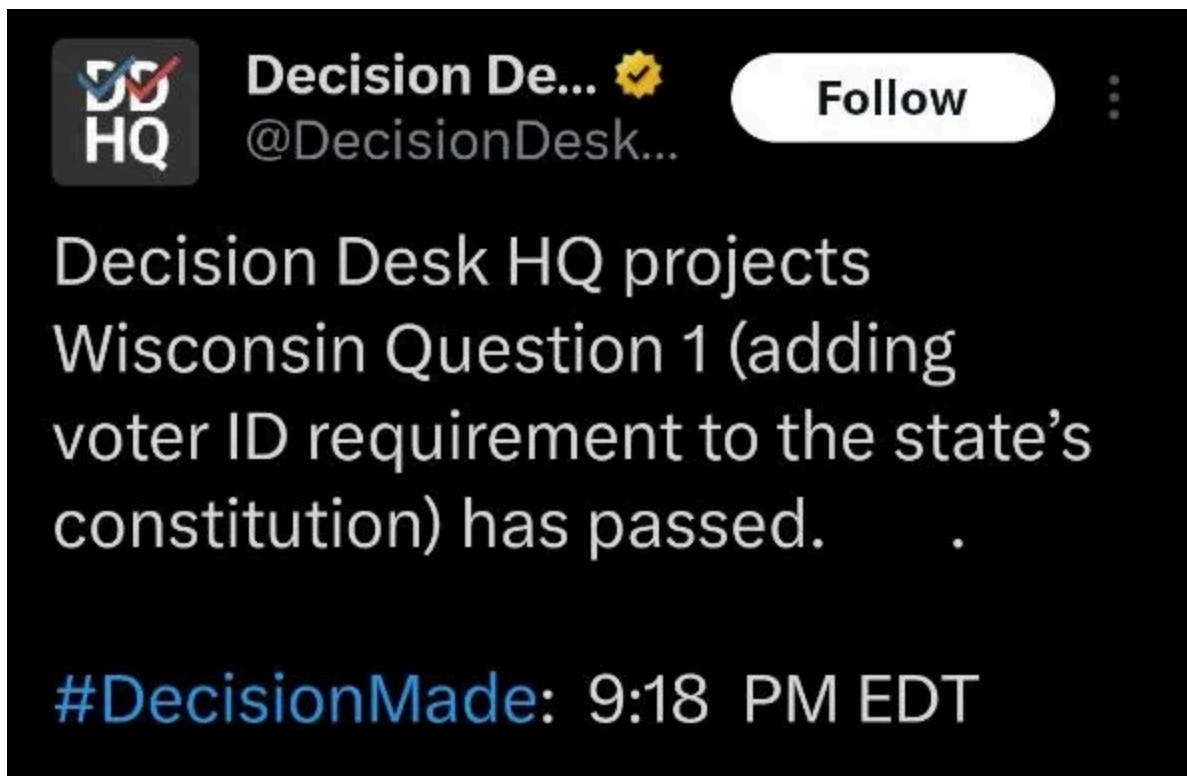

The country can't survive with mail-in voting.

9:36 AM · Apr 2, 2025 · **382.2K** Views

For those of you who still don't believe, let me show you more:

At 9:18PM ET they called the VOTER ID question on the ballot. If you voted YES o VOTER ID you were likely a Republican who ALSO VOTED FOR BRAD. Common sense.

At that time, 70% of the voters said YES to VOTER ID - and the final result was clo to that. So the consensus and the result did NOT change as time went on.

# Wisconsin Question 1 Require Voter Photo ID Amendment

County Results 

 Last Updated: Apr 1, 2025, 9:23 PM  
5% est. reporting 

| Candidates  | Party | Votes          | Pct.  |
|---|-------|----------------|-------|
| Yes  | OTH   | 89,441         | 70.2% |
| No  | OTH   | 37,905         | 29.8% |
| <b>Total</b>  |       | <b>127,346</b> |       |

\* Incumbent Election Date: 4/1/2025

AT THE SAME TIME that the VOTER ID question was CALLED for YES (Republicans) - Brad Schimel, the Republican candidate for the Wisconsin Supreme

Court, was AHEAD. That would track with the VOTER ID result because conservatives vote YES for VOTER ID and Democrats vote NO.

# Wisconsin State Supreme Court General Election

County Results

 Last Updated: Apr 1, 2025, 9:27 PM  
8% est. reporting 

| Candidates     | Party | Votes          | Pct.  |
|----------------|-------|----------------|-------|
| Brad Schimel   | NPA   | 103,673        | 54.3% |
| Susan Crawford | NPA   | 87,404         | 45.7% |
| <b>Total</b>   |       | <b>191,077</b> |       |

But, somehow, right after that, the vote flipped to the Democrat CRAWFORD and she won the race by 10 points. The results were literally flipped in the Supreme Court records. How does that happen without fraud? IT DOES NOT.

**T Buff** @toddbuffington1 · 3h

Grand scale election fraud in the WI Supreme Ct Justice race! This is what vote by mail, no ID and lax voting laws get you! Convenient drops of 1000s of ballots in the middle of the night!

**Wisconsin Supreme Court Race**

**Update:** Democrat-aligned candidate Susan Crawford defeated Republican-backed Brad Schimel by 10 points, 55 percent to 45 percent, in a race that drew tens of millions of dollars in spending. Reports are coming out of WI that the election was rigged. Also uncovered a chat between elected

 Tony Evers added you to the group

 Disappearing message time was set 1 week

Team - establishing a principle group for coordination on the April 1st election, particularly for the vote counting on the 1st and the 2nd. We need to put together our teams on the counting of the votes leading into the early morning of the 2nd. The extra are ready to be delivered in the usual manner. The need to secure the delivery, which will be at 1:30 AM.

The need to wait till all other counties complete their votes, to assure the number we need to make sure of the lead, not to exceed 52% for the lead.

**discovered a chat between elected officials in liberal counties waiting to deliver the "EXTRAS" in the usual manner. Copy of the chat is attached. You be the judge. VERY SUSPECT TO SAY THE LEAST | PENDING FURTHER INVESTIGATION.**

A friend of mine in the know said the fraudsters likely left the VOTER ID RACE ALONE and only TAMPERED WITH THE SUPREME COURT RACE because they were worried about losing Federal funding. That makes total sense.

Peggy, You nailed it! Good work, it looks like the Dems focused on the Supreme Court seat and left the voter ID alone, because they saw that Trump could use executive orders and the threat of holding back federal funds if their legislature didn't pass it, as he's doing in California.

He also said that the VOTER ID law that was passed in Wisconsin has a **major hole** it that still allows absentee ballots fraud from students - which is a major source of absentee ballot fraud on liberal campuses in Wisconsin. They run ballot mills on campus in Wisconsin just like they run ballot mills at public housing facilities like Cedar Riverside in Minneapolis. The new law says they can use UNOFFICIAL photo IDs to vote - which can be easily manipulated unlike an OFFICIAL STATE ID or passport! Another scam!

Figure it out? The hole in the law is it doesn't specify state issued ID! College and Indian IDs are easily reproduced and usually don't have an address!? Liberal students vote on campus, conservative students vote via their parents' address. These are two of the Dems biggest sources of fake ballots.

Seth Keshel wrote a great summary of what needs to happen in order to stop absent ballot fraud. It's a little complicated but it's right on:

KESHEL: These are the three destructive practices that need to be brought to a screeching halt and totally invalidated: Automatic voter registration, universal mail ballots and ballot harvesting.

### **I. Automatic Voter Registration (AVR)**

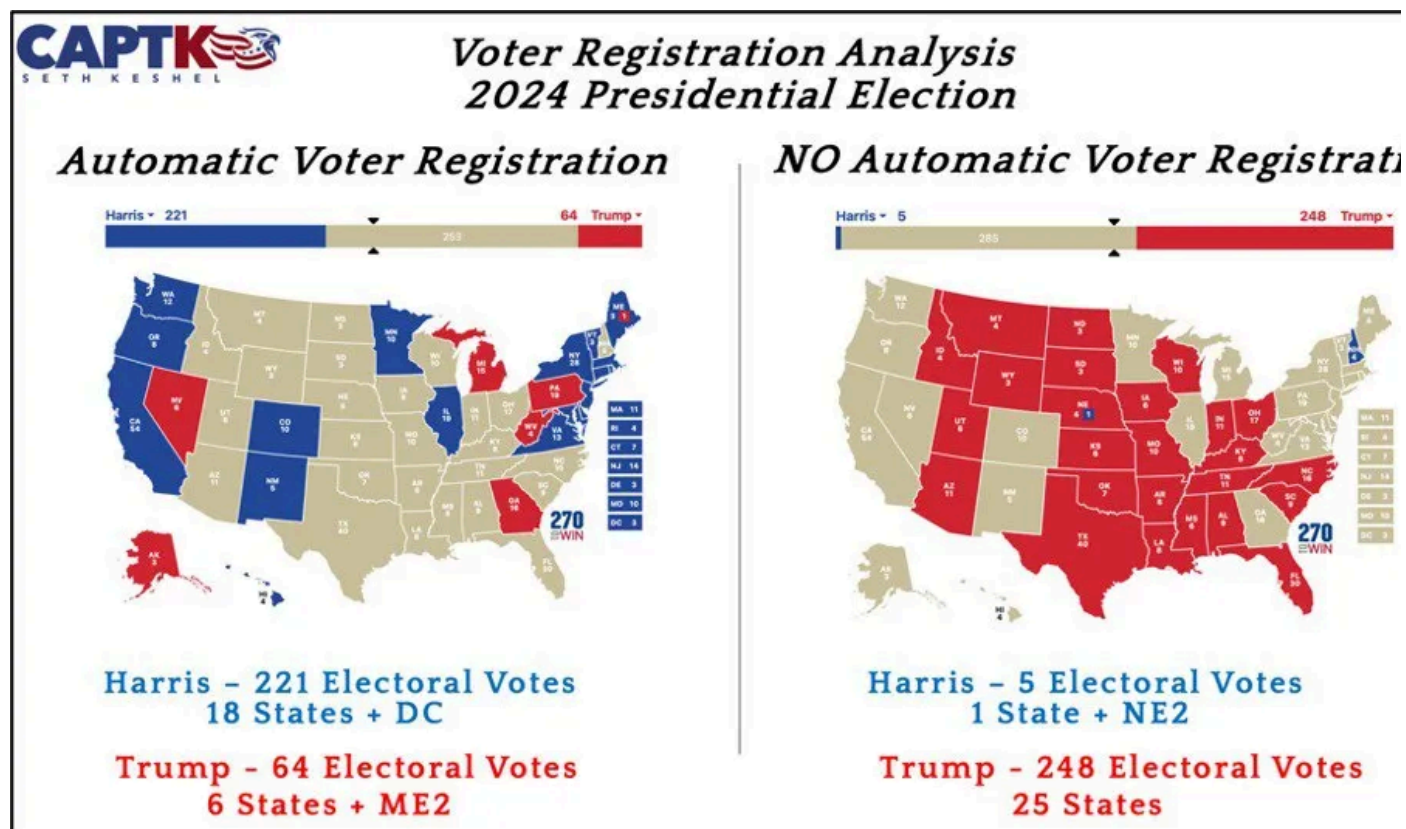

For all the talk about voting machines or mail-in ballots, the foundation of election corruption is found in the voter rolls of the various states. Trump's executive order focused primarily on illegal aliens and non-citizens in voter rolls, but doesn't address the duplicate (or triplicate, or worse) registrations spawned by moves, name change

or repeated government interactions that spawn registrations, or the fact that individuals who have no interest in taking part in the voting process get dumped in list of voters who may wind up being sent mail ballots simply because they exist.

My critics say I'm overreacting when I point out the disparity in voting patterns between states with Automatic Voter Registration (plus Washington, D.C.) and states without AVR. The contrast is stunning; in 2024, Kamala Harris won just five electoral votes that were not assigned to states with AVR. New Hampshire and Nebraska's 2nd Congressional District possess the only five electoral votes Harris received last November.

As the graphic shows, Harris won the electoral votes of AVR states (and Washington D.C.) 221 to 64, with Trump flipping Pennsylvania, Michigan, Georgia, and Nevada from 2020. The numbers from 2020, when fewer states operated Automatic Voter Registration, were even worse - with Biden winning their electoral votes by a stunning 243 to 9 tally.

states' rolls, could result in a total invalidation of Automatic Voter Registration and ordered purging of the rolls in their entirety, which would require a forced reconstruction of state rolls.

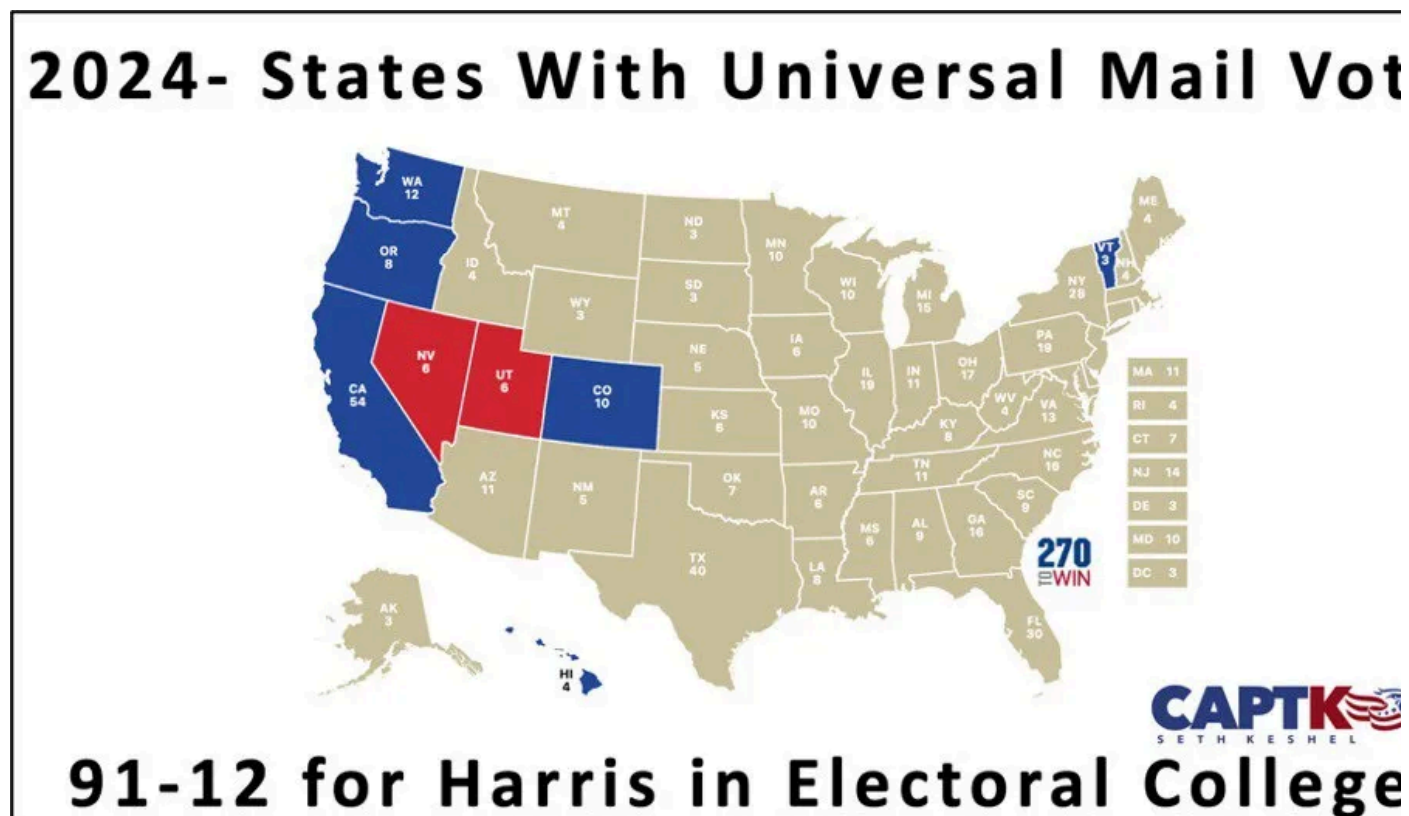

Top 15 States most impacted by an ordering invalidating AVR:

- California
- Washington
- Oregon
- Hawaii
- New York
- Illinois
- Colorado
- Minnesota
- Nevada
- Georgia
- Virginia
- Michigan
- Pennsylvania
- New Jersey
- New Mexico

## II. Universal Mail-In Voting (UMV)

Mail-in balloting is a problem no matter which way you slice it. The most severe form of mail-ballot corruption is the type classified as Universal Mail-In Voting (UMV), which is practiced by eight states. As much as I want to swing the federal hammer at states that have way too much mail voting (Florida, Arizona, Pennsylvania), I feel the net must be narrow to have a chance at succeeding.

The electoral vote splits for UMV states won't surprise you any more than the ones AVR did – UMV states are almost uniformly blue:

Trump did manage to flip Nevada's six electoral votes last fall, but the corrupt practices of the Silver State kept Jacky Rosen's U.S. Senate seat in Democrat hands after a week of counting. 2024 marked a slight GOP improvement from 2020, when Biden won the eight states that practice UMV 96 to 6 in the electoral vote tally. UMV is simple – every registration on the voter roll is mailed a mail-in ballot. States have different laws pertaining to returning those ballots and have limited opportunities to come cast a vote in person that depend on the state. What is the problem, you might ask?

We've already discussed that the corruption of the voter rolls results in non-citizens

illegal aliens, and duplicated (or worse) names being added to the roll. That is how voters in Washington wind up with 16 mail ballots at their apartments, and how Democrat gangsters in New Jersey, busted by the FBI, find the names they'll use to seed fraudulent mail ballot requests.

Here's how the corruption of the AVR-UMV link runs:

- Create fraudulent registrations (AVR)
- Ballots sent out in shotgun blast fashion to every registration (UMV)
- NGOs and other organizations sell data highlighting which registrations belong to nonexistent "person" and where to find ballot (projects, apartments, campuses, etc.)
- Early voting period used to collect ("harvest") ballots
- Lengthy counting period blamed on UMV used to sort ballots and guarantee outcomes

A successful litigation of this issue, citing nations like France, Mexico, Russia, Brazil and Japan, which do not allow for mailing ballots, and our own corruption, could result in the courts issuing an injunction against UMV and forcing states to downgrade, like Utah is doing voluntarily, to less dangerous practices that may be scaled down further in time.

Top 8 States most impacted by an ordering invalidating UMV:

- California
- Hawaii
- Oregon
- Washington
- Nevada

- Colorado
- Vermont
- Utah

### III. Ballot Harvesting

What good does it do a farmer to scatter much seed if he lacks the means to collect crops they produce? If you read the point above, the third action item for AG Bondi team should be to target ballot harvesting. In fact, Bondi was Florida's AG when California began introducing this corrupt idea, and the Sunshine State started craft measures against it. A number of states, including Florida, classify ballot harvesting (third party collection of ballots) as a felony – so why in the hell is it not up for debate that other states should likewise call the practice a serious criminal offense?

A lot of states have vague laws (or none, therefore permitting it) about ballot harvesting, so my electoral vote matrix is a mix of law and analysis, where I believe ballot harvesting is practiced based on precinct-level trend analysis:

# 2024- States With Ballot Harvesting

## 199-103 for Harris in Electoral Colleg

By a nearly 2 to 1 margin, Harris captured the electoral votes of states with legalized non-penalized ballot harvesting, or states that ban the practice on the books but are clearly impacted by it and have no means of enforcing the law. Arizona called the practice a Class 6 felony, but the state is overrun by NGOs and groups that facilitate the process, capitalizing on the crooked voter rolls the evil Maricopa Board of Supervisors won't let Recorder Justin Heap shred. This is also a major problem in Pima County, which when combined with Maricopa makes up 75% of the statewide vote.

The concept is simple:

- Create as many registrations as humanly possible (AVR), which bypasses registration fraud

- Get as many people signed up for mail ballots as possible, preferably with UMV (which bypasses mail-ballot request fraud), but as a fallback option, inclusion on a permanent mail-ballot list
- Arm paid activists with data as to where to find mail ballots, maximize early voting time, and pay them for each ballot returned

Republicans who think we can defeat Democrats long-term in the ballot harvesting (ballot chasing) game are pissing in the wind, because this favors population density and their organic low turnout and increasing disinterest in Democrat candidates bitime. Over 100,000 ballots are fair game in Philadelphia County, where registered voters and their phantom registered counterparts live piled one on top of the other. They have the manpower and the dark money to get the job done, especially when given 7 weeks to do it. How many loose ballots do you think can be found on the face of Juniata County, or in the sparsely populated neighborhoods of Cambria County, where they shut down grandpa's factory a few decades ago?

A strong argument here could result in a widespread, sweeping invalidation of the ballot harvesting practice and lead to prosecution of the NGOs and corrupt entities that fund smurfing, voter registration fraud rings, and the paid gathering of ballots.

Top 10 States most impacted by an ordering abolishing and criminalizing Ballot Harvesting:

- California
- Oregon
- Washington
- Nevada
- Colorado
- Wisconsin

- Pennsylvania
- Georgia
- Arizona
- Michigan

## 3 STEPS FOR TURNING A STATE BLUE

### I. Corrupt the Voter Registration Process

#### • *Automatic Voter Registration*

- Biden won 18 of 20 in 2020, 243-9 in Electoral College
- Harris won 18 of 24 in 2024, 221-64 in Electoral College

### II. Expand No-Excuse Mail-In Balloting

#### • *Universal Mail-In Balloting*

- Biden won 7 of 8 in 2020, 96-6 in Electoral College
- Harris won 6 of 8 in 2024, 91-12 in Electoral College

### III. Authorize Ballot Harvesting and Extend Early Vote

#### • *Unrestricted Harvesting and 5+ weeks of Voting*

- Harris won 16 of 25 in 2024, 199-103 in Electoral College

I know this is quite a bit of information to digest about election fraud and cheat-by-mail, but we can't fix a problem if we don't understand what it is and what the possible remedies actually are. Please read this twice and share it with a friend.

Also, remember that Fox News and the fake news won't report on election fraud because they fear lawsuits and the judges won't hear election fraud cases because they are either bribed, blackmailed or threatened. We the People are the only hope to fix this with God's help!
