

DC_Draino Comes To The Conclusion We Proved In March 2020

CoronaVirus Was A Live Exercise

I'll be honest, I don't think Covid-19 leaked from a Wuhan lab

I'm serious

I actually think it was intentionally unleashed

A carefully engineered bioweapon designed to cripple the booming American economy, facilitate orwellian medical tyranny, and provide cover for mass mail-in ballots that would help Democrats steal the 2020 election

And I'm not alone

X/Twitter commentator DC_Draino received 1.3 million views yesterday by stating he thought the CoronaVirus was unleashed on the American people to stifle a booming economy, to enforce medical tyranny, and force mail-in ballots. Our Potomac Group was smeared on CNN in March 2020, stating exactly that.

Our Potomac Group of twelve Citizen Journalists meeting on the Potomac River did just state a hunch. We had four whistleblowers from Fort Belvoir, along with a lawyer who represented other whistleblowers who said a Live Exercise lockdown was coming.

**I didn't expect this post to
get over 13,000
comments but this is
where a lot of people
stand**

**Covid was not an
“accident” or a “leak”**

**It was an intentionally
deployed bioweapon**

And it sadly won't be the
last [twitter.com/

wever, I did have two other direct, per... who

Our researchers had been working on the Ft. Belvoir story since 2017, focusing on the topic of military testing soldiers with experimental vaccines from the Defense Threat Reduction Agency (DTRA). The DTRA works on "countermeasure" vaccines for the U.S. Army, and we had word that a nanoferritin vaccine "countermeasure" had already been developed before the 2019 Wuhan Military Games in October 2019.

George Webb - Investigative...  **@RealGeorge...** · 1h **Promote** 

With President Trump shutting down USAID yesterday, the USAID PREDICT program to push mRNA vaccines finally has Presidential validation and verification. Here I am, telling Donie O'Sullivan of CNN exactly that in March 2020. (Sound enhanced with captions.)

the USAID PREDICT program was the

Department USAID PREDICT

Gain Of Function To Chinese

Academy Of Sciences

0:11 / 2:14    

In March 2020, we explained to Donie O'Sullivan of CNN that the experimental vaccine program was called USAID PREDICT. We explained how Fauci provided grants to U.S. universities, such as those to Ralph Baric at the University of North Carolina, to work on concealing the human engineering of the virus.

We had a dozen Citizen Journalists in a beachouse on the Potomac River near Washington, DC, witnessing the event over eighteen days in March 2020 with hundreds of thousands of online witnesses.

We even explained antibodies to Donie O'Sullivan at CNN, and who at Ft. Belvoir has the experimental vaccine from DTRA during the 2019 Wuhan Military Games. We explained how the Ft. Belvoir contingent at the Wuhan Military Games had been vaccinated and how other US team members did not have the experimental vaccine the first SuperSpreader event in Wuhan.

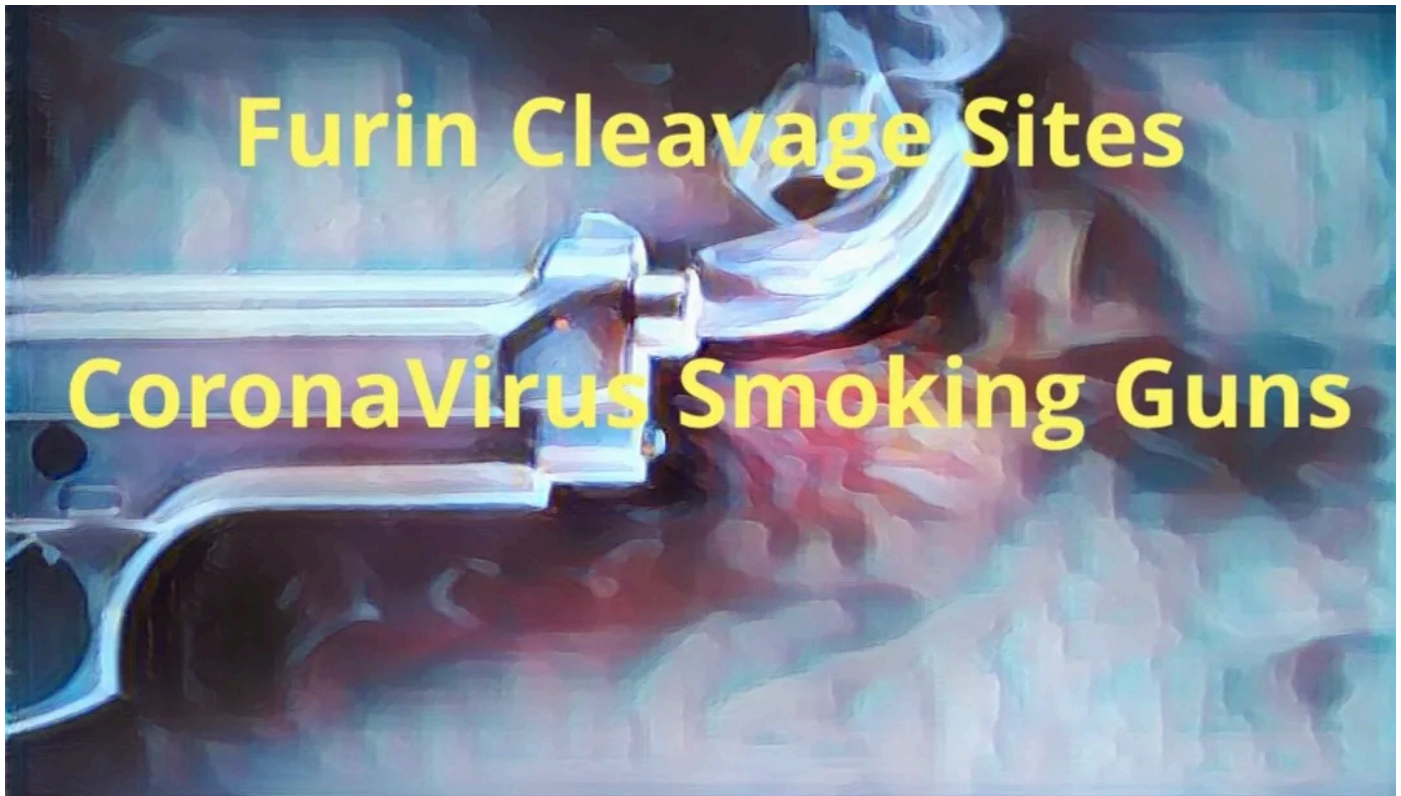

User Clip: "We are in a live exercise, here." - Mike Pompeo

President Trump says "Should have let us know." - it's unclear if Trump expecting more transparency from Pompeo or China. (Who should have let whom know?)

After our Potomac Group released the Live Exercise proclamation regarding Ft. Belv and the DTRA, Secretary of State Mike Pompeo appeared on national television and stated, "We are in a Live Exercise," confirming our conclusion.

Our Potomac Group found that Fort Belvoir Intelligence Command (INSCOM) and DTRA had collaborated with American universities, the Chinese Academy of Science and the Wuhan Institute of Virology to add the furin cleavage site to the CoronaVirus spike among other enhancements. This was not accidental.

We had developed four whistleblowers at Ft. Belvoir, and I had received death threats for myself and my family from a State Department attache named Ken Hale from a Navy Base in Virginia in February 2020 to suppress our reporting. Hale had threatened to “flamethrower” my family in addition to “Jonestowning” my family. Hale also threatened to “Waco” my family.

I am more than happy to share all our investigative work with @DC_Draino or any investigative body in Washington, DC, as our Potomac Group has been offering to c for the last five years. The American people deserve answers on this National Tragedy so that it never happens again.

Replying to [@kelly30102](#) and [@DC_Draino](#)

You can see Trump digging now. Wait till he finds out the US State Dept engaged NATO to run the Live Exercise.

Did you ask your whistle blowers at Ft. Belvoir about the Patriot missile they fired at the Pentago Sept 11? Yup, they did fire that missile. That's why you see a ROUND HOLE (before it caved in) in Pentagon right after the strike, but no airplane debris at all. And that's also why you see those pe walking shoulder to shoulder over the lawn looking for missile debris and why they smelled cord the Bldg.
